

Olympiad Test Paper — Sanskrit (Class 7) — Paper 4

Chapter 4: न लभ्यते चेत् आम्लं द्राक्षाफलम् (The Fox and the Grapes)

Paper 4 — (progressively harder)

Subject	Sanskrit (NCERT Class 7, Deepakam)
Chapter	4 — न लभ्यते चेत् आम्लं द्राक्षाफलम् (The Fox and the Grapes)
Total Questions	60 (Multiple Choice, single correct)
Maximum Marks	240
Suggested Time	90 minutes

Marking scheme: +4 for each correct answer · -1 for each wrong answer · 0 if unattempted.

Instructions: Each question has four options (A), (B), (C), (D); exactly one is correct. National-Olympiad traps: the moral indicts only the dishonest EXCUSE, never the failed effort (vain striving can even be noble); न लभ्यते is PASSIVE ('is not obtained') with लभ् in the saving-the-agent voice, so the fox dodges naming himself; चेत् and यदि both mean 'if' but चेत् sits inside/after the clause while यदि fronts it; उत्पतति is PRESENT (उत्=उपसर्ग 'up'), past is उदपतत् where prefix+augment उत्+अ→उद; the तसिल् -तः makes indeclinable direction ADVERBS (वामतः), not noun cases, and pairs as opposites वामतः/दक्षिणतः, अग्रतः/पृष्ठतः; पिपासा (←पा 'drink') and बुभुक्षा (←भुज् 'eat') are reduplicated DESIDERATIVES named by the action desired; द्राक्षालता=the whole VINE (द्राक्षा+लता तत्पुरुष), द्राक्षा=the single grape, द्राक्षाफलम्=the grape-fruit; आम्ल=sour, opposite of मधुर sweet. Do not write on this paper — mark answers on your answer sheet.

1. The chapter twice avoids naming the fox as the agent of failure: it says न लभ्यते ('is not obtained') rather than 'the fox does not get it'. A deeper reading treats this passive as part of the SAME psychological move as calling the grapes आम्लम्. What is that shared move?

- (A) Praising the grapes honestly in two different grammatical ways
- (B) Shifting attention away from the fox's own shortcoming — first by an impersonal verb, then by blaming the fruit
- (C) Describing the fox's tiredness with two synonyms
- (D) Reporting the same event twice for poetic emphasis with no change of blame

2. Suppose the punchline were rewritten actively as शृगालः द्राक्षाफलं न लभते. Compared with the original passive न लभ्यते, what does the rewrite FORCE that the original lets the fox avoid?

- (A) It names शृगालः as the explicit subject who fails, removing the impersonal cover
(B) It changes the tense from present to past
(C) It turns आम्लम् into a verb of eating
(D) It makes the grapes the doer who refuse the fox

3. The title uses चेत् for 'if'. Sanskrit also has यदि for 'if'. A student rewrites the conditional with यदि. Which rewrite preserves both the meaning AND the normal placement difference between the two words?

- (A) यदि आम्लम् द्राक्षाफलम् — putting यदि before the verdict, since यदि means 'sour'
(B) द्राक्षाफलं यदि आम्लम् न लभ्यते — since यदि must always go last like चेत्
(C) यदि द्राक्षाफलं न लभ्यते (तर्हि) आम्लम् — यदि fronts the clause, where चेत् more typically follows a word inside it
(D) लभ्यते यदि चेत् द्राक्षाफलम् — using both words together for emphasis

4. Both चेत् and यदि can render English 'if' here. From the fable's logic, which statement about the CONDITION they introduce is correct?

- (A) The condition is 'if the fox is tired', so fatigue causes the sourness
(B) The condition is 'if the grapes are eaten', so tasting proves them sour
(C) There is no real condition; चेत् here just means 'therefore'
(D) The verdict 'sour' is presented as following only from the condition 'if not obtained' — making the judgement contingent on failure, not on tasting

5. उत्पतति is present, उदपतत् is past, उत्पतिष्यति is future. A student claims उत्पतिष्यति must be past 'because it has the most letters and looks oldest'. The precise refutation is:

- (A) It is indeed past, since longer forms in Sanskrit are always older tenses
(B) Length is irrelevant; the -ष्य- infix marks the future, while the past is shown by the augment अ- (उदपतत्), absent here
(C) It is present, because -ष्य- is a present marker
(D) It is imperative, because it ends in -ति like a command

6. In उदपतत् the surface shows उद, but it is built from उत् + अ + पतत्. Which single change accounts for उत् appearing as उद before the augment?

- (A) Voicing sandhi: the त् of उत् becomes the soft द् before the following vowel-augment अ
(B) The prefix is simply dropped and a new उद- is added
(C) The root पत् is replaced by पद् in the past
(D) The augment अ- merges into त् without any change of sound

7. A learner argues: 'Any verb beginning with उत्/उद् is past tense, because उदपतत् is past.' Test this against उत्पतति and उत्पतिष्यति. The correct conclusion is:

- (A) The claim holds, since उत्पतति and उत्पतिष्यति are also secretly past
(B) The claim holds only for roots beginning with प
(C) The claim is half-right: उत्पतति is past but उत्पतिष्यति is present
(D) The claim fails: उत् is a meaning-prefix ('up') shared by present उत्पतति and future उत्पतिष्यति, so the initial उत्/उद् cannot by itself mark past

8. द्राक्षालता and द्राक्षाफलम् share the first member द्राक्षा. Analysing both as compounds, which statement about their SECOND members and resulting senses is exactly right?

- (A) लता ('creeper') gives 'grape-creeper' = the vine (plant); फलम् ('fruit') gives 'grape-fruit' = the grapes themselves
- (B) लता ('fruit') gives the grapes; फलम् ('creeper') gives the vine
- (C) Both second members mean 'plant', so the two words are exact synonyms
- (D) लता means 'sour' and फलम् means 'sweet', so they describe taste

9. द्राक्षाफलम् is a तत्पुरुष compound. Which expanded paraphrase best shows the relation between its members?

- (A) द्राक्षायाः फलम् — 'the fruit OF the grape(-plant)', a genitive relation
- (B) द्राक्षा च फलम् च — 'grape and fruit', two coordinate things
- (C) द्राक्षा एव फलम् — 'the grape is itself nothing but a fruit', an appositional identity with no relation
- (D) फलं द्राक्षां करोति — 'the fruit makes a grape', a verbal relation

10. If the fox were judging the PLANT rather than its fruit, the title would more properly read न लभ्यते चेत् आम्ला द्राक्षालता. Why does the chapter instead keep द्राक्षाफलम्?

- (A) Because द्राक्षालता cannot take the adjective आम्ल
- (B) Because the fox wants to EAT, his verdict targets the edible fruit (the grapes), not the inedible climbing plant
- (C) Because द्राक्षालता means a single grape, too small to name
- (D) Because the plant, not the fruit, is what hangs out of reach

11. पिपासा and बुभुक्षा both begin with a doubled syllable (पि-पासा, बु-भुक्षा). A student says this doubling marks the plural 'many drinks/foods'. The correct account is:

- (A) It marks the plural, so पिपासा = 'many drinks'
- (B) It is the past-tense augment, doubled for past actions
- (C) It is a direction prefix like उत्, adding the sense 'up'
- (D) The reduplication marks the DESIDERATIVE — the WISH to perform the root's action — not number

12. Build a NEW word from दृश् ('to see') on the same desiderative pattern as पिपासा and बुभुक्षा. Its meaning would be:

- (A) 'a wish/desire to see' (a desiderative built on दृश्)
- (B) 'has already seen' (a past tense)
- (C) 'on the seeing side' (a -तः direction adverb)
- (D) 'two acts of seeing' (a plural)

13. Why does knowing ONLY the root reliably tell you whether a desiderative means thirst or hunger, even before you know the rest of the form?

- (A) Because the root encodes how many times one is hungry or thirsty
- (B) Because the root shows the direction of the desire (left/right)

(C) Because the root fixes the tense, which then implies the feeling

(D) Because the root names the very action wished for — पा 'drink' → thirst, भुज् 'eat' → hunger

14. The chapter foregrounds पिपासा for the fox at this moment but not बुभुक्षा. What is the most disciplined inference?

(A) The scene highlights his wish to DRINK; it neither asserts nor denies hunger — the two words simply track different desires

(B) A fox can feel only thirst and never hunger

(C) पिपासा and बुभुक्षा mean the same thing, so the choice is arbitrary

(D) Using पिपासा proves the fox had just eaten a full meal

15. श्रान्तः is glossed क्लान्तः, and खिन्नः is kept separate. A friend insists all three are loose synonyms for 'sad'. The sharpest correction is:

(A) All three mean 'thirsty', describing the throat

(B) श्रान्तः means 'sour' and खिन्नः means 'sweet'

(C) श्रान्तः and क्लान्तः both name bodily fatigue, while खिन्नः names mental dejection — so 'tired' and 'sad' are not the same

(D) खिन्नः is bodily tiredness and श्रान्तः is mental sadness

16. The opening stacks श्रान्तः, खिन्नः, पिपासायुक्तः on the fox. A reviser drops one word so that only PHYSICAL states remain. Which word must go, and why?

(A) श्रान्तः, because tiredness is a mood, not a body state

(B) पिपासायुक्तः, because thirst is purely emotional

(C) None, since all three are mental states

(D) खिन्नः, because it names a mental state (dejection), unlike the bodily fatigue and bodily thirst of the other two

17. The suffix -युक्त in पिपासायुक्तः literally means 'joined with / possessed of'. So पिपासायुक्तः most precisely means:

(A) 'one who is filled with thirst' — still wanting to drink, not one who has finished drinking

(B) 'one who has already drunk his fill' (C) 'one who has lost all thirst'

(D) 'one who is joined to the left side', a direction word

18. The तसिल् adverbs come in opposite pairs. Standing where the fox stands, facing the vine अग्रतः, a coin lies पृष्ठतः and a stone दक्षिणतः. Where, relative to the fox, are the coin and stone?

(A) The coin is in front; the stone is on the left

(B) The coin is behind the fox; the stone is on the fox's right

(C) The coin is on the left; the stone is behind

(D) The coin is on the right; the stone is in front

19. वामतः and वामम् both involve वाम. Which statement captures the grammatical difference AND its consequence in a sentence?

- (A) वामतः is the plural of वामम्, so it means 'many left things'
- (B) वामतः is a past-tense verb 'turned left', वामम् its present
- (C) वामतः is an indeclinable adverb 'on the left' (with -तः) that modifies an action; वामम् is an inflected case-form that would behave like a noun/adjective object
- (D) They are interchangeable in every position with identical force

20. Predict the तसिल् adverb for 'on the upper side' built on the base उपरि-region, by analogy with वामतः, अग्रतः. The pattern yields:

- (A) उपराय — a dative form '-आय'
- (B) उपरिष्यति — a future verb '-ष्यति'
- (C) उपरिस्य — a genitive '-स्य'
- (D) उपरितः — '-तः' attaches to the base to make a direction adverb 'at/from the upper side'

21. A sentence reads शृगालः वामतः अपश्यत्. Identify the tense of the verb AND the role of वामतः together.

- (A) अपश्यत् is present, and वामतः is the object 'a left thing' he saw
- (B) अपश्यत् is past ('looked'), and वामतः is an adverb telling WHERE he looked — 'to the left'
- (C) अपश्यत् is future, and वामतः names the subject who looked
- (D) अपश्यत् is past, and वामतः tells WHEN he looked

22. A guide says चल दक्षिणतः, ततः पश्य पृष्ठतः. In plain English the two instructions are:

- (A) 'Go to the left, then look ahead'
- (B) 'Go to the right, then look behind'
- (C) 'Go ahead, then look to the left'
- (D) 'Go behind, then look to the right'

23. The progression एकवारम् → द्विवारम् → पुनः पुनः is more than counting; it is placed BEFORE the verdict आम्लम् for a narrative reason. That reason is:

- (A) It proves the fox never really tried, making laziness the moral
- (B) It shows the grapes were truly sour, justifying the verdict
- (C) It marks three different directions the fox jumped toward
- (D) It establishes that genuine, escalating effort preceded the excuse, so the moral can target the dishonest verdict rather than laziness

24. The chapter distinguishes striving in vain (which can be noble) from making a dishonest excuse (which is faulty). Which pair of examples correctly separates the two?

- (A) Both climbers are equally at fault for attempting the peak
- (B) The climber who trains again is the one the fable condemns
- (C) A climber who fails a peak yet trains again = noble striving; a climber who fails and then sneers 'that peak is worthless' = the fox's fault
- (D) Only the sneering climber is praised, for honesty about his feelings

25. Which real-life case is the SHARPEST parallel to the fox — matching both 'failed despite effort' AND 'belittled the goal afterward'?

- (A) A student who never studies and is honestly disappointed at not being selected
- (B) A student who studies hard, is not selected for the quiz team, and then declares the contest 'pointless and stupid'
- (C) A student who is selected and humbly thanks his teacher
- (D) A student who fails but quietly resolves to prepare better next time

26. Identify the statement that is NOT a fair restatement of the fable's moral:

- (A) 'Do not belittle what you fail to obtain'
- (B) 'Be honest about a failure instead of inventing an excuse'
- (C) 'Never attempt anything that might be out of reach'
- (D) 'Wounded pride can tempt us to lie about what we could not get'

27. What does the fox's choice to SPEAK the verdict aloud (rather than silently walk away) add to the moral's force?

- (A) It proves the fox could actually have reached the grapes
- (B) It shows the grapes were genuinely sour after all
- (C) It exposes an active need to justify the failure to himself/others — the very rationalisation the fable condemns
- (D) It reveals he was never thirsty in the first place

28. Stated as a maxim ('IF not obtained, THEN sour') rather than 'these particular grapes are sour', the punchline gains what?

- (A) A claim that all unreachable fruit really is sour
- (B) Generality — it turns one fox's excuse into a universal pattern any reader can recognise in themselves
- (C) A report that the fox finally ate the grapes
- (D) A lesson restricted to grapes and nothing else

29. लभ्यते is the passive of the root लभ् ('to obtain/get'). Which active sentence has the SAME root meaning the fox is denying about himself?

- (A) शृगालः फलं न खादति — 'the fox does not eat the fruit'
- (B) शृगालः फलं न लभते — 'the fox does not obtain the fruit'
- (C) शृगालः फलं न पश्यति — 'the fox does not see the fruit'
- (D) शृगालः फलं न इच्छति — 'the fox does not want the fruit'

30. आम्लम् ('sour') is the verdict; its natural antonym for what the grapes most likely were is मधुरम् ('sweet'). The dramatic irony of the punchline rests on:

- (A) The fox calling presumably SWEET grapes SOUR — the verdict is the opposite of the likely truth
- (B) The fox calling sour grapes sweet, flattering the fruit

- (C) The fox correctly reporting genuinely sour grapes
(D) The fox describing the grapes' colour rather than taste

31. In the title's आम्लं द्राक्षाफलम्, the form आम्लं (for आम्लम्) before द्राक्षाफलम् shows which sandhi behaviour of final म्?

- (A) Final म् is dropped entirely before a consonant
(B) Final म् changes to न् before any word
(C) Final म् before a consonant is written as the anusvāra ँ (आम्लम् → आम्लं द्राक्षाफलम्)
(D) Final म् doubles to म् before द्

32. Order the four verb-forms of this root by tense/mood: पततु, उत्पतिष्यति, उदपतत्, उत्पतति. Choose the correct labelling.

- (A) उदपतत् = past, उत्पतति = present, उत्पतिष्यति = future, पततु = imperative (a command, off the time-line)
(B) उत्पतति = past, उदपतत् = present, पततु = future, उत्पतिष्यति = imperative
(C) पततु = past, उत्पतिष्यति = present, उत्पतति = future, उदपतत् = imperative
(D) उत्पतिष्यति = past, पततु = present, उदपतत् = future, उत्पतति = imperative

33. उत्- in उत्पतति and उद्गच्छति lends the same sense to two different roots (पत् 'fall/fly', गम् 'go'). What general truth about उपसर्गs does this illustrate?

- (A) A prefix can attach to only one fixed root
(B) One prefix can attach to many roots, each time adding its own sense ('up/upward')
(C) A prefix changes a verb's tense, not its meaning
(D) A prefix is itself a noun that takes case endings

34. उत्पतति literally combines 'up' + a root that can mean 'fall/fly'. In the fable's action, the best English sense is:

- (A) 'falls down' — the fox dropping to the ground
(B) 'flies away' — the fox leaving the forest
(C) 'leaps/springs up' — the fox jumping upward toward the grapes
(D) 'sits up' — the fox waking from sleep

35. लोमशा glosses शृगालः by pointing to a physical trait. A reasoner uses लोमशा to rule out one candidate identity for the protagonist. Which does it rule out, and why?

- (A) A furry mammal — because लोमशा means 'hairless'
(B) Any forest animal — because लोमशा means 'lives in water'
(C) A bird — because लोमशा means 'feathered', which fits a bird
(D) A smooth, hairless reptile — because लोमशा means 'hairy/furry', which a reptile is not

36. वने tells us the setting. Parsing the form, which translation is grounded in its actual case, and what does that case express here?

- (A) 'to the forest' — वने is a dative of motion toward
- (B) 'of the forest' — वने is a genitive of possession
- (C) 'forests' — वने is the plural
- (D) 'in the forest' — वने is the locative of वनम्, expressing place where

37. Why is शृगालः, not द्राक्षालता, the protagonist, on a structural reading of the story?

- (A) The vine never appears in the story at all
- (B) The fox performs every action — wandering, jumping, finally speaking — while the vine stays an unmoving object of desire
- (C) द्राक्षालता is simply another name for the fox
- (D) The vine speaks the moral, sharing the lead

38. Match each grape-word to its precise sense: द्राक्षा, द्राक्षाफलम्, द्राक्षालता.

- (A) द्राक्षा = the grape (fruit); द्राक्षाफलम् = the grape-fruit (the grapes); द्राक्षालता = the grape-vine (the plant)
- (B) द्राक्षा = the vine; द्राक्षाफलम् = a single seed; द्राक्षालता = a grape
- (C) द्राक्षा = sourness; द्राक्षाफलम् = the fox; द्राक्षालता = the forest
- (D) द्राक्षा = the fruit-plant; द्राक्षाफलम् = a leaf; द्राक्षालता = a single grape

39. A classmate writes उत्पतत् for 'he leapt up'. Why is उदपतत् required instead?

- (A) Because the prefix उत् is dropped entirely in the past
- (B) The past needs the augment अ-; inserting it after the prefix gives उत्+अ+पतत्, and उत्+अ becomes उद → उदपतत्
- (C) Because the root पत् becomes पठ् in the past
- (D) Because the past tense uses the ending -ति, as in उत्पतति

40. Two travellers: one carried loads uphill all day; the other has had no water in the heat. Assign the single best chapter-word to each.

- (A) The load-carrier is श्रान्तः (tired); the waterless one is पिपासायुक्तः (thirsty)
- (B) The load-carrier is पिपासायुक्तः; the waterless one is श्रान्तः
- (C) Both are best called आम्लम् (sour)
- (D) Both are best called बुभुक्षायुक्तः (hungry)

41. Pair each तसिल् adverb with its TRUE opposite: वामतः, अग्रतः.

- (A) वामतः ('left') ↔ दक्षिणतः ('right'); अग्रतः ('front') ↔ पृष्ठतः ('behind')
- (B) वामतः ↔ अग्रतः; पृष्ठतः ↔ दक्षिणतः
- (C) वामतः ↔ पृष्ठतः; अग्रतः ↔ दक्षिणतः
- (D) वामतः ↔ वनम्; अग्रतः ↔ द्राक्षा

42. Why is reading the उत् of उत्पतति as 'proof of past tense' a category error?

- (A) It is no error — every prefix automatically makes a verb past
- (B) उत् does mark the past, but only on the root पत्
- (C) उत् belongs to the category of meaning-prefixes, while tense lives in a different category (the augment/endings); a prefix simply cannot mark tense
- (D) The verb is actually future, so it can never be read as past

43. A summary claims: 'The fox teaches us to give up early and then insult what we wanted.' Counting against the real moral, how many errors does it contain?

- (A) No errors — the summary is exactly right
- (B) One — giving up early is fine, but insulting is wrong
- (C) Two — the moral is NOT to give up early, and NOT to insult what we wanted; both halves are wrong
- (D) One — insulting is fine, but giving up early is wrong

44. Apply श्रान्तः/क्लान्तः to a fresh case: a runner who has just crossed the finish line of a marathon and can barely stand. The best single word is:

- (A) आम्लम् (sour) (B) वामतः (on the left)
- (C) श्रान्तः (tired/exhausted) (D) पिपासायुक्तः only — and never श्रान्तः

45. Which single statement about these forms is FALSE?

- (A) उत्पतति is present, meaning 'he leaps up'
- (B) उदपतत् is a present-tense form meaning 'he leaps up'
- (C) वामतः is a direction adverb formed with -तः (D) पिपासा comes from the root पा ('drink')

46. Which row is the ONLY one where the word AND its grammatical label are BOTH correct?

- (A) उदपतत् — a present-tense form (B) पिपासा — a past-tense form
- (C) अग्रतः — a noun in the dative case (D) उत्पतिष्यति — a future-tense form of the verb

47. Combine moral and grammar: which compound statement is ENTIRELY correct?

- (A) The lesson is to give up early; उत्पतति is past; and पिपासा comes from भुज्
- (B) The lesson is not to belittle failure; but उत्पतति is past and पिपासा comes from भुज्
- (C) The lesson is to belittle what we fail to get; उत्पतति is present; पिपासा comes from पा
- (D) The lesson is not to belittle what we fail to get; उत्पतति is present; and पिपासा (thirst) comes from पा ('drink')

48. A final synthesis: the title न लभ्यते चेत् आम्लं द्राक्षाफलम् simultaneously names the OBJECT, the CONDITION and the VERDICT. Identify all three.

- (A) Object = the grape-fruit (द्राक्षाफलम्); condition = if not obtained (न लभ्यते चेत्); verdict = 'sour' (आम्लम्)
- (B) Object = the fox; condition = if tired; verdict = 'on the left'
- (C) Object = the vine; condition = if jumped; verdict = 'sweet'
- (D) Object = the forest; condition = if thirsty; verdict = 'behind'

49. Consider the abstract structure of sour-grapes thinking: first a desire for a goal, then a failure to reach it, then a re-evaluation that downgrades the goal. The fable locates the moral FAULT at which step?

- (A) At the desire — wanting the goal at all
- (B) At the failure — not reaching the goal despite trying

(C) At the re-evaluation — the dishonest downgrading of the goal after failing

(D) At every step equally, since the whole episode is blameworthy

50. Two scenarios: (i) the fox, having failed, says 'I could not reach them today'; (ii) the fox says 'they are sour anyway'. Which scenario escapes the fable's criticism, and on what principle?

(A) (ii) escapes — confidently dismissing the goal protects self-esteem, which the fable praises

(B) (i) escapes — it is an honest admission of failure; the fable faults only the dishonest re-labelling in (ii)

(C) Both escape — any reaction to failure is acceptable

(D) Neither escapes — speaking at all after failure is the fault

51. A learner generalises: 'Whenever Sanskrit fuses two nouns, the FIRST noun is always the main idea.' Test this on द्राक्षालता (grape-vine), where the whole thing IS a vine. The verdict is:

(A) False here — the SECOND member लता (vine) is the head; द्राक्षा merely qualifies it, so this is the opposite of the claim

(B) True — द्राक्षा (grape) is the head, so the compound denotes a grape

(C) True — both members are equally the head, so it means 'grape and vine'

(D) Irrelevant — द्राक्षालता is not a compound at all

52. From पठ् ('to read') a desiderative on the पिपासा/बुभुक्षा pattern would be coined to mean 'wish to read'. Which property would it SHARE with पिपासा, and which would DIFFER?

(A) Share: the exact root पा; Differ: only the tense

(B) Share: a direction sense; Differ: the number

(C) Share: the past-tense augment; Differ: the case ending

(D) Share: the reduplicated desiderative shape marking 'wish to ...'; Differ: the root-action (reading vs drinking), so the desire is different

53. The verdict आम्लम् is grammatically an ADJECTIVE agreeing with द्राक्षाफलम् (neuter). If the fox were instead judging द्राक्षालता (feminine vine), the adjective should appear as आम्ला. What single feature drives this change?

(A) A change of tense from present to past (B) A sandhi rule turning ण् into anusvāra

(C) The तसिल् suffix attaching to the adjective

(D) Adjective–noun agreement in gender: neuter द्राक्षाफलम् takes आम्लम्, feminine द्राक्षालता takes आम्ला

54. The fable could be retold with a different unreachable object and the moral would hold. Which retelling preserves the EXACT logical pattern of the original?

(A) A cat fails to catch a high bird and then declares 'that bird is too scrawny to bother with'

(B) A cat easily catches a bird and praises how plump it is

- (C) A cat ignores a bird it never wanted and walks on
(D) A cat catches a bird, finds it scrawny, and truthfully says so

55. A teacher says: 'न लभ्यते is passive, so the punchline has NO active doer expressed.' Is this consistent with the fox being the one who fails, and how?

- (A) No — a passive must always name its doer, so the fox is explicitly stated
(B) No — the passive makes the grapes the active doer
(C) Yes — but only because लभ्यते is actually an active verb
(D) Yes — the passive leaves the failing agent unexpressed; the fox is understood as the implicit non-obtainer, which is exactly the evasive effect

56. Across the chapter, the GRAMMAR focus and the MORAL focus reinforce one theme of 'getting things right'. Which pairing best states what each focus is?

- (A) Grammar: the dative case and number agreement; Moral: the value of saving money
(B) Grammar: the तसिल् -तः direction adverbs plus the desiderative/state vocabulary of thirst, hunger and fatigue; Moral: honesty about failure rather than sour-grapes excuses
(C) Grammar: irregular future verbs only; Moral: never attempt hard goals
(D) Grammar: the synonyms of the Sun; Moral: respect for elders

57. Final integrative judgement: which ONE statement is correct on EVERY count — narrative, grammar, and moral?

- (A) A rested fox leapt up (उत्पतति, past), obtained the sweet (आम्लम्) grapes, and the moral praises his patience
(B) A thirsty fox flew away (उत्पतति, future), the vine being on the left (आम्लम्), and the moral is about directions
(C) A tired (श्रान्तः) fox leaps up (उत्पतति, present) repeatedly, fails to obtain (न लभ्यते, passive) the grape-fruit, and dishonestly calls it sour (आम्लम्) — the moral being against such excuse-making
(D) A hungry fox sat down (उदपतत्, present), got the grape-vine, and the moral is to give up early

58. The desideratives पिपासा (←पा) and बुभुक्षा (←भुज्) are nouns naming a wish. The verbs श्रान्तः 'describes' do not name a wish but a finished STATE. Which contrast best captures this difference of meaning-type?

- (A) Both name finished conditions, differing only in which body part
(B) Both name future actions not yet begun
(C) पिपासा/बुभुक्षा name an ongoing DESIRE to act, while श्रान्तः names a resulting CONDITION already arrived at
(D) पिपासा names a condition and श्रान्तः names a desire — the reverse

59. Suppose a retelling kept every event but ENDED before the fox spoke — he simply walks away after failing. Which element of the moral would be LOST?

- (A) The lesson about not attempting hard things, which the speech supplied
- (B) The grammar of the तसिल् direction adverbs, which depends on the speech
- (C) The exposure of the dishonest excuse — without the spoken verdict 'sour', there is only honest, silent failure, and no rationalisation to condemn
- (D) Nothing — the moral is fully carried by the jumping alone

60. A student offers a 'translation' of the title as 'The grape-fruit is sour because it was obtained.' Pinpoint the SINGLE logical inversion that makes this wrong.

- (A) It wrongly translates द्राक्षाफलम् as 'fox'
- (B) It wrongly makes आम्लम् mean 'sweet'
- (C) It wrongly changes लभ्यते to a future tense
- (D) It reverses the condition: the original says sour IF NOT obtained, not 'because it WAS obtained'

Solutions — Sanskrit (Class 7), Chapter 4: न लभ्यते चेत् आम्लं द्राक्षाफलम् (The Fox and the Grapes) — Paper 4

Paper 4 — (progressively harder)

Marking: +4 correct, –1 wrong, 0 unattempted. Maximum marks **240**.

Answer-key distribution: A = 15, B = 15, C = 15, D = 15.

Worked Solutions

- (B)** Both devices steer the spotlight off the fox: the agentless passive hides who failed, and the verdict 'sour' faults the fruit. They are two faces of one self-protective evasion, not honest praise, mere synonyms for fatigue, or empty repetition.
- (A)** Putting the verb in the active voice with शृगालः as subject pins the failure squarely on the fox by name. The tense stays present, आम्लम् stays an adjective, and the grapes are not made agents.
- (C)** यदि normally opens the conditional clause and pairs with तर्हि, whereas चेत् characteristically sits after a word within the clause; the faithful rewrite fronts यदि on the same न-लभ्यते condition. यदि does not mean 'sour', need not go last, and is not stacked with चेत्.

- 4. (D)** The clause ties the label 'sour' strictly to not-obtaining, exposing that the judgement rides on failure rather than any taste. Fatigue, eating, and a 'therefore' reading all misread the conditional.
- 5. (B)** The future is signalled by the -ष्य- element, not by word length; the past would need the augment अ-, which उत्पत्तिष्यति lacks. So it is neither past, present, nor imperative.
- 6. (A)** Before the augment-vowel अ, the unvoiced त् of the prefix softens to voiced द्, yielding उद-अ-पतत् = उदपतत्. The prefix is not replaced, the root does not become पद्, and the त् does change.
- 7. (D)** Present उत्पत्ति and future उत्पत्तिष्यति both carry उत् yet are not past, so the prefix is not a tense marker. Tense is fixed by endings/augment, not by उत्/उद्.
- 8. (A)** लता is the climbing plant and फलम् is the fruit, so द्राक्षालता is the vine and द्राक्षाफलम् the grapes. The members are not swapped, not synonyms, and not taste-words.
- 9. (A)** A तत्पुरुष resolves with a case relation between members; here the natural sense is 'the fruit of the grape(-vine)', a genitive. It is not a dvandva 'X and Y', not a bare identity, and not a verbal clause.
- 10. (B)** The whole drama is about the fruit he cannot eat, so the verdict 'sour' applies to द्राक्षाफलम्. The vine can take an adjective, द्राक्षालता is the whole plant not a single grape, and it is the fruit that is out of reach.
- 11. (D)** Reduplication in these forms signals the desiderative 'wishing to drink/eat', a desire-pattern, not plurality, past tense, or a directional prefix.
- 12. (A)** The desiderative on दृश् yields 'wish to see' (the form दिदृक्षा), parallel to thirst and hunger. It is not a past tense, a direction adverb, or a plural.
- 13. (D)** A desiderative means 'wish to [root-action]', so the root alone fixes whether the desire is to drink (thirst) or eat (hunger). The root carries neither number, direction, nor the feeling's tense.
- 14. (A)** Choosing पिपासा spotlights thirst without ruling on hunger; the words name distinct desires. Foxes do feel hunger, the two words are not synonyms, and the choice implies nothing about a recent meal.
- 15. (C)** श्रान्त/क्लान्त = physically worn out; खिन्न = low in spirit. They are not all 'sad', none means 'thirsty' or 'sour/sweet', and the body/mind labels are not reversed.
- 16. (D)** खिन्नः alone is mental (dejection); श्रान्तः (fatigue) and पिपासायुक्तः (thirst) are bodily. So removing खिन्नः leaves only physical conditions.

17. (A) -युक्त adds 'endowed with', so the fox is 'endowed with thirst', i.e. still thirsty. It does not mean having drunk, losing thirst, or a direction.

18. (B) पृष्ठतः = behind and दक्षिणतः = on the right, so the coin is behind and the stone to the right. The other options scramble these fixed senses.

19. (C) The -तः form is a fixed direction adverb modifying the verb, while वामम् is a declined nominal. They are neither plural-of-each-other, verbs, nor freely interchangeable.

20. (D) Applying the तसिल् pattern gives a -तः adverb उपरितः. A dative, future-verb, or genitive ending would not produce a direction adverb.

21. (B) अपश्यत् carries the past augment अ- ('looked'), and वामतः is a direction adverb 'on/to the left' modifying the looking. It is neither present nor future, and वामतः is not the object, subject, or a time-word.

22. (B) दक्षिणतः = to the right, पृष्ठतः = behind. The other options swap these senses.

23. (D) By showing real, mounting effort first, the tale isolates the fault in the later excuse, not in any laziness. It does not show non-effort, prove sourness, or name directions.

24. (C) The fable faults only the sneering rationaliser, not the one who strives again. Attempting is not the fault, the persistent trainer is praised not condemned, and the sneer is dishonest, not honest.

25. (B) The exact parallel pairs real effort with a sour-grapes put-down of the goal. The other cases lack the effort, lack the failure, or lack the belittling excuse.

26. (C) The moral never forbids attempting hard things — striving can be noble. The other three correctly capture honesty about failure and the danger of prideful excuses.

27. (C) Speaking the excuse externalises the self-justifying habit at the heart of the lesson. It does not prove reachability, real sourness, or absent thirst.

28. (B) The general form makes the excuse a recognisable human pattern. It does not assert real sourness, narrate eating, or confine the point to grapes.

29. (B) The active counterpart of लभ्यते uses लभते ('obtains'). Eating (खादति), seeing (पश्यति), and wanting (इच्छति) are different roots and not what लभ् denies.

30. (A) The irony is that desirable (sweet) grapes are branded sour to excuse failure — verdict opposite to likely truth. He does not flatter them, report truly, or speak of colour.

31. (C) Word-final म् before a following consonant is regularly represented by anusvāra ँ. It is not dropped, not turned to न्, and not doubled.

32. (A) The augment अ- gives past उदपतत्, plain -ति gives present उत्पतति, -ष्य- gives future उत्पतिष्यति, and -तु gives the imperative पततु. The other orderings misassign these markers.

33. (B) उत् adds 'up' to both पत् and गम्, showing prefixes are mobile meaning-adders across roots. They are not root-locked, not tense-changers, and not declined nouns.

34. (C) With उत् 'up', the verb means springing upward — the fox jumping for the grapes. It is not falling down, flying off, or sitting up.

35. (D) लोमशा means covered in hair/fur, which excludes a smooth hairless reptile while fitting the fox. It does not mean hairless, aquatic, or feathered.

36. (D) वने is the locative singular of वनम्, marking the location of the action ('in the forest'). It is not a dative, genitive, or plural.

37. (B) Agency drives protagonist-hood: the fox acts throughout; the vine merely is desired. The vine does appear, is not the fox, and does not speak.

38. (A) द्राक्षा is the grape, द्राक्षाफलम् the grape-fruit, द्राक्षालता the whole vine. The other rows scramble these senses.

39. (B) Past tense demands the augment अ- before the root; with the prefix, उत्+अ softens to उद, yielding उदपतत्. The prefix is not dropped, the root is unchanged, and -ति is not the past ending.

40. (A) Exertion → श्रान्तः; lack of drink → पिपासायुक्तः. The labels are not reversed, and neither traveller is 'sour' or specifically 'hungry'.

41. (A) Left opposes right and front opposes back, so वामतः/दक्षिणतः and अग्रतः/पृष्ठतः are the true pairs. The others mismatch axes.

42. (C) Prefixes (sense) and tense-markers (augment/endings) are distinct grammatical categories; conflating them is the error. उत् is not a tense marker on any root, and the form is present, not future.

43. (C) Both clauses misstate the lesson: it neither endorses early surrender nor sour-grapes insults. So there are two errors, not zero or one.

44. (C) Bodily exhaustion is exactly श्रान्तः. 'Sour', 'on the left', and 'only thirsty, never tired' do not fit.

45. (B) उदपतत् is PAST ('he leapt up'), so calling it present is the false statement. The other three are accurate.

46. (D) उत्पतिष्यति is indeed future (-ष्य-). उदपतत् is past not present, पिपासा is a desiderative noun not a past tense, and अग्रतः is an adverb not a dative noun.

- 47. (D)** Only the first option gets all three right: the honest-failure moral, present उत्पत्ति, and पिपासा from पा. Each distractor breaks at least one of these.
- 48. (A)** द्राक्षाफलम् is the object, न लभ्यते चेत् the condition, आम्लम् the verdict. The distractors misname all three.
- 49. (C)** Wanting the goal and failing-despite-effort carry no moral fault; the fault is the after-the-fact dishonest downgrade. The episode is not blameworthy at every step.
- 50. (B)** Honest admission (i) is fine; the dishonest 'sour' verdict (ii) is the target. The fable does not praise face-saving dismissal, nor condemn all speech or all reactions.
- 51. (A)** In द्राक्षालता the second member लता is the head (it is a kind of vine), refuting a 'first-member-is-head' rule. It does not denote a grape, is not a coordinate 'grape and vine', and is genuinely a compound.
- 52. (D)** All desideratives share the reduplicated 'wish-to' pattern but differ by their root-action; so a पठ्-desiderative shares the shape with पिपासा but names a different desire. It does not share पठ्'s root, a direction, or a past augment.
- 53. (D)** Sanskrit adjectives match their noun's gender, so the form shifts आम्लम् (neuter) → आम्ला (feminine). It is not a tense change, the म्□□ sandhi, or a -तः suffix.
- 54. (A)** The pattern needs desire + failure + dishonest downgrade; the scrawny-excuse-after-failing cat matches it. Easy success, no desire, or an honest report after a real catch all break the pattern.
- 55. (D)** An agentless passive can omit the doer, leaving the fox implicit — the very evasion the fable exposes. The passive need not name its agent, does not make grapes the doer, and लभ्यते is not active.
- 56. (B)** The chapter's grammar centres on -तः adverbs and the desiderative/state words, and its moral on honest acceptance of failure. The other pairings name material foreign to this chapter.
- 57. (C)** Only the first option is right throughout: श्रान्तः tired, present उत्पत्ति, passive न लभ्यते, आम्लम् 'sour', and the anti-excuse moral. Each distractor breaks the narrative, a tense label, the meaning of आम्लम्, or the moral.
- 58. (C)** Desideratives express a present wish to perform an action, whereas श्रान्तः (a past participle in sense) marks an already-reached state of fatigue. They are not both conditions, not future actions, and the roles are not reversed.
- 59. (C)** The moral lives in the spoken excuse; remove it and only blameless silent failure remains, with nothing to condemn. The fable never teaches against attempting, the -तः grammar is independent of the speech, and the jumping alone does not deliver the moral.

60. (D) The error flips न लभ्यते चेत् ('if NOT obtained') into 'because it WAS obtained' — inverting the very condition. The noun, the adjective 'sour', and the present tense are all rendered correctly.
