

Olympiad Test Paper — Sanskrit (Class 7) — Paper 3

Chapter 5: सेवा हि परमो धर्मः (Seva Hi Paramo Dharmah)

Paper 3 — (progressively harder)

Subject	Sanskrit (NCERT Class 7, Deepakam)
Chapter	5 — सेवा हि परमो धर्मः (Seva Hi Paramo Dharmah)
Total Questions	60 (Multiple Choice, single correct)
Maximum Marks	240
Suggested Time	90 minutes

Marking scheme: +4 for each correct answer · -1 for each wrong answer · 0 if unattempted.

Instructions: Each question has four options (A), (B), (C), (D); exactly one is correct. Watch the Paper-3 traps: परमो in परमो धर्मः is a विसर्ग-सन्धि form of परमः (परमः+धर्मः → परमो धर्मः), NOT a separate word; सेव् धातु is आत्मनेपदी (सेवते, not सेवति); रोगिन् is an इन्-stem so its accusative plural is रोगिणः (with ण by णत्व), while चिकित्सकः is an अ-stem (चिकित्सकम्/चिकित्सकान्); -वत् in यन्त्रवत् is the 'like/इव' तद्धित (NOT the possessive 'having' sense); मानवीय takes the -ईय तद्धित on मानव; and कषाय shifts between 'decoction' and the astringent रस by context, never by number or gender. Do not write on this paper — mark answers on your answer sheet.

1. In the line सेवा हि परमो धर्मः, the word परमो is NOT a word on its own. It is the sandhi-form of which word, joined to धर्मः?

- (A) परमम् (the neuter accusative, परमम् + धर्मः) (B) परमे (a locative, परमे + धर्मः)
(C) परमः (परमः + धर्मः → परमो धर्मः) (D) परमौ (a dual, परमौ + धर्मः)

2. The particle हि sits between सेवा and परमो धर्मः. Removing हि from सेवा हि परमो धर्मः would chiefly change the sentence by:

- (A) turning the statement into a question
(B) weakening the emphasis — it would still mean 'service is the highest duty', but lose the 'verily/indeed' force
(C) making the sentence grammatically impossible to complete
(D) negating it, so it would mean 'service is not the highest duty'

3. सेवा हि परमो धर्मः ranks सेवा as परमः among धर्माः. The single best paraphrase of what 'परमः among duties' logically implies is:

- (A) service is the only duty there is (B) service is the easiest duty to perform
(C) service is the duty done earliest each day
(D) other duties may exist and be real, but none outranks service

4. If a writer wanted to coin a parallel motto 'compassion is verily the highest virtue' on the exact pattern of सेवा हि परमो धर्मः, the slot filled by धर्मः (the predicate noun) corresponds in the new motto to:

- (A) 'compassion' (the subject) (B) 'verily' (the emphatic particle)
(C) 'virtue' (the predicate noun the subject is said to be the highest of)
(D) 'highest' (the ranking adjective)

5. A student paraphrases the thesis as 'Among all the things one ought to do, service stands at the very top.' This paraphrase is:

- (A) accurate — it captures both परमः ('top rank') and धर्मः ('what one ought to do')
(B) inaccurate, because परमः means 'first in time', not 'top rank'
(C) inaccurate, because धर्मः means 'wealth', not 'what one ought to do'
(D) inaccurate, because the thesis is about दान, not सेवा

6. विसर्ग-सन्धि (the rule that turned परमः into परमो before धर्मः) applies the same way to बालः + गच्छति. The correct joined form is:

- (A) बालो गच्छति (B) बालः गच्छति (no change)
(C) बाला गच्छति (D) बालर् गच्छति

7. By the same विसर्ग rule seen in परमो धर्मः, which one of these joins is performed CORRECTLY?

- (A) रामः + करोति → रामो करोति (B) रामः + वदति → रामो वदति
(C) रामः + तिष्ठति → रामो तिष्ठति (D) रामः + पठति → रामो पठति

8. The form परमो appears because परमः precedes धर्मः. If instead परमः stood at the end of a sentence (in pause), or before a vowel like अयम्, its विसर्ग would:

- (A) always become ओ in every position regardless of what follows
(B) always disappear completely in every position
(C) stay as विसर्ग in pause (परमः), and the -अः would not become ओ before अ in परमः + अयम् → परमोऽयम् only because अ is the trigger — but in plain pause it remains परमः
(D) always become र् in every position

9. Undoing the sandhi in सेवा हि परमो धर्मः to its word-by-word (pre-sandhi) form gives:

- (A) सेवाः हि परमः धर्मः (B) सेवा हि परमम् धर्मम्
(C) सेवा हि परमो धर्मो (D) सेवा हि परमः धर्मः

10. Which pair, when joined, gives an -ओ exactly the way परमः + धर्मः does?

- (A) देवः + एव → देवो एव (B) देवः + इति → देवो इति
(C) देवः + ददाति → देवो ददाति
(D) देवः + अपि → देवो अपि (written as two separate words with a gap)

11. The motto could be expanded to परमो धर्मः सेवा एव. Joining सेवा + एव correctly (vowel sandhi) gives:

- (A) सेवाएव (no change) (B) सेवेव (आ + ए → ऐ)
(C) सेवैव (आ + ए → ऐ) (D) सेवायव

12. The chapter draws a fine line between सेवा and दान. A philanthropist mails a large grant to a flood-relief fund but never visits. By the chapter's distinction, this is:

- (A) सेवा — because helping flood victims is service by definition
(B) दान — giving resources from a distance, lacking the personal presence that सेवा requires
(C) neither, because relief work is outside both terms
(D) both equally, since money and presence are the same thing

13. Two helpers aid the same sick man: helper X funds his medicines remotely; helper Y sits with him nightly, feeds him, and prepares his कषायम्. The chapter would say:

- (A) X performs सेवा and Y performs दान
(B) Y performs सेवा and X performs दान; the chapter especially exalts Y's सेवा
(C) both perform दान, since both ultimately help
(D) both perform सेवा, since intention is all that matters

14. Which statement best captures WHY the chapter, while honouring both, calls सेवा (not दान) the परमो धर्मः?

- (A) दान is morally wrong, so only सेवा can be a duty
(B) सेवा demands the giver's own time, body and presence, which is harder and more personal than parting with money alone
(C) दान is impossible for ordinary people, so it cannot be ranked
(D) सेवा is cheaper, so it is the more practical duty

15. A child argues: 'Whenever I give my pocket money to a beggar, I am doing सेवा.' The chapter's most precise correction is:

- (A) giving money is never a good deed at all
(B) that is already perfect सेवा and needs no correction
(C) सेवा and दान are identical words, so the child is right either way
(D) giving money is दान; it becomes सेवा only when joined with your own time and presence in helping

16. Which scenario best counts as सेवा WITHOUT any element of दान?

- (A) a businessman who anonymously wires funds to an orphanage
(B) a donor who sponsors a hospital wing but never visits
(C) a foundation that ships free medicines overseas
(D) a student who has no money but spends every evening reading aloud to a blind elder

17. चिकित्सकः and रोगी belong to different declension stems. चिकित्सकः is an अ-stem (like बालः); रोगी comes from रोगिन्, an इन्-stem. The accusative SINGULAR of each is, respectively:

- (A) चिकित्सकः and रोगी (unchanged) (B) चिकित्सकेन and रोगिणा
(C) चिकित्सकाः and रोगिणः (D) चिकित्सकम् and रोगिणम्

18. The doctor 'serves the sick (plural)'. Since सेव् governs the accusative, 'the sick' as the object should appear as the accusative plural of रोगिन्, which is:

- (A) रोगिणः (B) रोगिणम् (accusative singular)
(C) रोगिभिः (instrumental plural) (D) रोगिणाम् (genitive plural)

19. Why does the न् of रोगिन् surface as ण in रोगिणम् / रोगिणः, while चिकित्सकम् keeps a plain क?

- (A) णत्वः an र (in रोग-) earlier in the word retroflexes a following न् into ण; चिकित्सक has no such trigger affecting its क
(B) because इन्-stems always replace every consonant with its retroflex
(C) because accusative endings always carry a ण
(D) because चिकित्सकः is feminine and रोगिन् is masculine

20. The -क in चिकित्सकः marks the agent ('one who heals'), and the -इन् in रोगिन् marks the one characterised by the condition ('one having रोग'). Building parallel words, the 'one who teaches' (अध्यापक) and 'one having wealth (धन)' would be:

- (A) अध्यापिन् and धनकः
(B) अध्यापकः (agent -क) and धनिन् (possessive -इन्)
(C) both with -कः अध्यापकः and धनकः (D) both with -इन्ः अध्यापिन् and धनिन्

21. रोगी (nominative singular) looks like it ends in ई, yet it is listed as an इन्-stem. The best explanation is:

- (A) the underlying stem is रोगिन्; in the nominative singular the न् is dropped and the ई lengthens to ई, giving रोगी — but oblique cases reveal the न् (रोगिणम्, रोगिणः)
(B) रोगी is really an ई-stem like नदी, and रोगिन् is a printing error
(C) रोगी and रोगिन् are unrelated words that happen to look similar
(D) रोगी is the feminine of रोगिन्

22. Pairing each word with the right case-form for the sentence 'the physician (subject) serves the sick (object, plural)':

- (A) चिकित्सकम् (acc.) ... रोगिणः (acc. pl.) (B) चिकित्सकः (nom.) ... रोगिभ्यः (dat./abl. pl.)
(C) चिकित्सकेन (instr.) ... रोगिणाम् (gen. pl.) (D) चिकित्सकः (nom. sg.) ... रोगिणः (acc. pl.)

23. If the story spoke of TWO physicians serving ONE sick man, the subject and object forms would become:

- (A) चिकित्सकाः and रोगिणः (B) चिकित्सकौ and रोगिणौ
(C) चिकित्सकौ (nom. dual) and रोगिणम् (acc. sg.) (D) चिकित्सकम् and रोगी

24. The verb सेव् ('to serve') is आत्मनेपदी. Its correct third-person SINGULAR present is:

- (A) सेवति (B) सेवयति
(C) सेवते (D) सेविष्यति

25. Keeping सेव् in आत्मनेपद, 'they (plural) serve' is correctly:

- (A) सेवन्ते (B) सेवन्ति
(C) सेवते (D) सेवामहे

26. In चिकित्सकः रोगिणः सेवते, the object रोगिणः stands in the accusative. Which English rendering matches the Sanskrit case-roles exactly?

- (A) 'the sick serve the physician' (B) 'the physician serves the sick'
(C) 'the physician serves WITH the sick' (D) 'the physician's sickness serves'

27. 'I serve the sick daily' would render the verb (आत्मनेपद, first-person singular present) of सेव् as:

- (A) सेवे (B) सेवामि
(C) सेवसे (D) सेवामहे

28. Because सेव् takes its object in the accusative, the phrase 'serves the king (नृप)' would be:

- (A) नृपेण सेवते (B) नृपं सेवते
(C) नृपाय सेवते (D) नृपस्य सेवते

29. यन्त्रवत् is glossed यन्त्रम् इव, with -वत् meaning 'like'. Forming 'like a lion (सिंह)' on the same pattern gives:

- (A) सिंहिन् (B) सिंहकः
(C) सिंहवत् (D) सिंहाय

30. There are TWO senses of -वत्: 'like' (इव, as in यन्त्रवत्) and 'possessing/having' (as in धनवत्, 'having wealth'). In यन्त्रवत् describing the tireless doctor, the intended sense is:

- (A) 'having' (he owns a machine)
(B) 'like' (he works LIKE a machine) — not 'having a machine'
(C) 'against' (he opposes machines) (D) 'without' (he lacks a machine)

31. Which coinage with -वत् keeps the SAME 'like / इव' sense used in यन्त्रवत्?

- (A) पुत्रवत् in the sense 'having a son' (B) अग्निवत् — 'like fire' (blazing, fierce)
(C) बुद्धिवत् in the sense 'possessing intelligence' (D) गुणवत् in the sense 'possessing virtues'

32. Describing a nurse as 'सरितवत्' (river-like) in her service would, on the यन्त्रवत् model, most aptly praise:

- (A) her ownership of a river (B) her cold, lifeless rigidity
(C) her continuous, never-stopping flow of care, like a river that keeps moving
(D) her tendency to overflow and cause harm

33. Glossing यन्त्रवत् as यन्त्रम् इव rather than 'tool-like' matters because the chapter's praise rests on a machine's specific quality of:

- (A) tireless, steady, repetitive action without flagging
- (B) being made of metal and gears
- (C) being expensive and modern
- (D) being controlled by a human operator

34. A coach who drills his team without ever tiring, hour after hour, is best described in the chapter's idiom as working:

- (A) रोगिवत् (like a sick man)
- (B) उपाधिवत् (like a degree)
- (C) कषायवत् (like a decoction)
- (D) यन्त्रवत् (like a machine, tirelessly)

35. उपाधि: and पदवी are easily confused. Map each to its definition: 'the qualification one EARNs by study' and 'the post/rank one HOLDS in an organisation'.

- (A) उपाधि: = post/rank held; पदवी = earned qualification
- (B) उपाधि: = earned qualification (degree); पदवी = post/rank held
- (C) both mean the same: an academic degree
- (D) उपाधि: = a medicine; पदवी = a machine

36. A surgeon is offered the title 'Head of Department' (a post) and separately is awarded an honorary doctorate (a qualification). In the chapter's vocabulary these are, respectively:

- (A) उपाधि: (post) and पदवी (degree)
- (B) पदवी (post held) and उपाधि: (qualification/degree)
- (C) both पदवी
- (D) both उपाधि:

37. The chapter says the doctor 'set aside the pursuit of उपाधि: and पदवी'. The deeper point of naming BOTH (degree and post) rather than just one is to show that he renounced:

- (A) both kinds of outward distinction — academic credentials AND official rank — for the sake of सेवा
- (B) only academic study, while still chasing high office
- (C) only high office, while still chasing degrees
- (D) his medical practice itself

38. Which one-line statement best preserves the chapter's ranking among सेवा, उपाधि:, and पदवी?

- (A) उपाधि: outranks सेवा, because without a degree one cannot serve
- (B) पदवी outranks सेवा, because rank gives the power to serve
- (C) सेवा outranks both उपाधि: and पदवी; the degree and the post are means or trappings, service is the supreme duty
- (D) all three are equal, since each helps people

39. A clinic posts a sign: 'We hire only doctors with the highest उपाधि: and पदवी.' The chapter's likeliest critique is:

- (A) credentials and posts are not the measure of a healer; सेवा and humane care matter more
- (B) the clinic is right — only degrees and posts make a good doctor
- (C) the clinic should hire only the wealthiest doctors
- (D) the clinic should value machines (यन्त्र) over doctors

40. मानवीया: is built as मानव ('human') + the तद्धित suffix -ईय. Building the parallel adjective from देव ('god') on the same pattern gives:

- (A) देववत् (with -वत्, 'like a god') (B) देविन् (with -इन्, 'having a god')
- (C) दैवीय / दैव (with -ईय, 'pertaining to / befitting a god')
- (D) देवकः (with -क, 'one who gods')

41. The chapter prizes मानवीया: गुणाः over उपाधि: and पदवी. The single best gloss of मानवीया: गुणाः in this contrast is:

- (A) the number of human beings present
- (B) humane qualities — compassion, kindness, and care befitting a human being
- (C) qualities that machines possess (D) the strength of a grown man's body

42. मानवीया: (nom. pl. masc.) modifies गुणाः. If instead it modified a single feminine noun सेवा ('service'), the correctly agreeing form would be:

- (A) मानवीया: (unchanged) (B) मानवीयम् (neuter singular)
- (C) मानवीया (feminine singular, मानवीया सेवा) (D) मानवीयान् (masculine accusative plural)

43. The chapter's logic 'a person's worth lies in मानवीया: गुणाः, not in उपाधि:/पदवी' most closely parallels which everyday judgement?

- (A) judging a teacher by how many certificates hang on her wall
- (B) judging a teacher by her job title alone (C) judging a teacher by her salary
- (D) judging a teacher by how kindly and patiently she helps students, not by how many certificates hang on her wall

44. Putting मानवीया: गुणाः and यन्त्रवत् together, the ideal servant the chapter paints is one who is:

- (A) tireless in effort (यन्त्रवत्) yet warm and humane (मानवीया:) in spirit — machine-like in stamina, human-like in heart
- (B) cold and mechanical in every way, feelings included
- (C) warm-hearted but quick to tire and give up
- (D) indifferent both in effort and in feeling

45. कषाय has two senses: a herbal decoction (क्वाथ) and one of the six tastes (षड्रस). The taste sense of कषाय is:

- (A) astringent (B) sweet (मधुर)
- (C) sour (अम्ल) (D) bitter (तिक्त)

46. कषायम् in the chapter's medical scene is glossed क्वाथः. The deciding clue that fixes the 'decoction' (medicine) sense rather than the 'astringent taste' sense is:

- (A) the gender of the word कषायम्
- (B) the grammatical number (singular vs plural)
- (C) the position of the word in the sentence
- (D) the CONTEXT — the doctor is preparing it to treat a sick patient

47. If a cookery text said भोजने कषायः रसः अस्ति ('in the food there is a कषाय रस'), the intended meaning of कषाय there is:

- (A) the astringent taste (B) a herbal decoction served as a drink
(C) an Ayurvedic medicine (D) a doctor's prescription

48. Preparing कषायम् for a patient is offered in the chapter as concrete proof that the doctor's सेवा is:

- (A) a way to earn an उपाधि: (B) a step toward a higher पदवी
(C) a substitute for visiting the patient
(D) actual hands-on care, not mere words or sentiment

49. Which statement about कषाय is FULLY correct?

- (A) it always means a machine, regardless of context
(B) it can mean a herbal decoction (medicine) or the astringent taste, and context decides which
(C) it always means the astringent taste and never a medicine
(D) it means a degree in a medical scene and a medicine elsewhere

50. Match each word to the SUFFIX that builds it: चिकित्सक, रोगिन्, यन्त्रवत्, मानवीय.

- (A) -इन्, -क, -ईय, -वत् (B) -वत्, -ईय, -क, -इन्
(C) all four use -क
(D) -क (agent), -इन् (possessive/characterising), -वत् ('like'), -ईय ('befitting/pertaining to')

51. Exactly ONE of these word-meaning pairs is wrong. Identify it.

- (A) उपाधि: = a degree (correct) (B) कषायम् = a herbal decoction (correct)
(C) मानवीया: = humane (correct)
(D) पदवी = a herbal decoction (WRONG: पदवी is a post/position)

52. Which role-and-suffix description is entirely CORRECT?

- (A) चिकित्सकः is the agent (the one who heals, -क); रोगिन् is the one characterised by रोग (the sick, -इन्); the physician serves the sick
(B) चिकित्सकः is the sick (-इन्); रोगिन् is the healer (-क)
(C) both चिकित्सकः and रोगिन् name the medicine (D) चिकित्सकः takes -इन् and रोगिन् takes -क

53. Which line correctly states the chapter's value-ranking AND backs it with the right example?

- (A) मानवीया: गुणा: and सेवा outrank उपाधि: and पदवी — shown by the doctor who drops degrees and posts to serve the sick
(B) उपाधि: and पदवी outrank सेवा — shown by a doctor who collects titles
(C) धनम् is the परमो धर्मः — shown by a wealthy donor
(D) यन्त्र outranks the doctor — shown by replacing him with a machine

54. Which sandhi/grammar statement drawn from the lesson is CORRECT?

- (A) परमो is a separate adjective unrelated to परमः; सेव् gives सेवति
- (B) परमो धर्मः shows no sandhi at all; सेव् is परस्मैपदी
- (C) परमो comes from परमम्; सेव् gives सेवयति in the simple present
- (D) परमो in परमो धर्मः is परमः with its विसर्ग turned to ओ before the voiced ध्; सेव् is आत्मनेपदी, giving सेवते

55. A student writes: 'सेवा हि परमो धर्मः — i.e. doing one's morning duty first is the supreme service.' How many distinct errors does this paraphrase contain?

- (A) zero — the paraphrase is correct
- (B) one — only the परमः error
- (C) three — परमः, सेवा, and हि are all mistranslated
- (D) two — it misreads परमः as 'first in time' and swaps the subject/predicate so that 'service' becomes the predicate instead of the subject

56. Synthesising the whole lesson, the doctor proves सेवा हि परमो धर्मः BEST because, in one chain, he:

- (A) earns the most उपाधिः, wins the top पदवी, and treats only the wealthy
- (B) renounces उपाधिः and पदवी, works यत्नवत् with मानवीयाः गुणाः, and tirelessly serves रोगिणः — every choice ranks सेवा above outward distinction
- (C) donates money from afar (दान) without ever attending a patient
- (D) works यत्नवत् but only when paid, ignoring मानवीयाः गुणाः

57. Which single sentence simultaneously (a) honours the परमः = 'highest rank' meaning, (b) keeps सेवा distinct from दान, and (c) reflects the यत्नवत् + मानवीय balance?

- (A) 'Service is the first duty of the morning, best done by sending money tirelessly.'
- (B) 'Giving money from afar is the highest duty, done coldly and mechanically.'
- (C) 'Service ranks highest among duties; rendered in person rather than from afar, it is given tirelessly yet with a warm, humane heart.'
- (D) 'Service is one of many equal duties, best done by chasing titles humanely.'

58. The chapter could be summed up as a contrast between 'what one HAS' and 'what one DOES'. Mapping its key words: which words sit on the 'what one HAS' side, and which on the 'what one DOES' side?

- (A) HAS: सेवा and कषायम्; DOES: उपाधिः and पदवी
- (B) HAS: मानवीयाः गुणाः; DOES: उपाधिः and पदवी
- (C) HAS: उपाधिः, पदवी (degree, post); DOES: सेवा — the tireless serving of रोगिणः with मानवीयाः गुणाः
- (D) all the words name things one HAS

59. If a debater claimed 'the chapter is really about valuing degrees, since it keeps mentioning उपाधिः and पदवी,' the sharpest rebuttal is:

- (A) it never mentions उपाधिः or पदवी at all, so the debater invented them
- (B) it values degrees over service, so the debater is correct

(C) it mentions उपाधि: and पदवी precisely to rank them BELOW सेवा — naming them is part of showing the doctor renounces their pursuit

(D) it treats degrees, posts and service as exactly equal in value

60. Read this layered claim and pick the fully correct correction: 'चिकित्सकः रोगी सेवति — meaning the sick man serves the doctor, working यन्त्रवत् because he owns a machine.'

(A) The sentence is fully correct as written

(B) Only the verb is wrong: it should be सेवति remaining परस्मैपद, but the roles are fine

(C) Only यन्त्रवत् is wrong; the sick man does serve the doctor

(D) It should be चिकित्सकः रोगिणः सेवते — the PHYSICIAN serves the SICK; सेवते is आत्मनेपद; and यन्त्रवत् means 'LIKE a machine' (tireless), not 'owning' one

Solutions — Sanskrit (Class 7), Chapter 5: सेवा हि परमो धर्मः (Seva Hi Paramo Dharmah) — Paper 3

Paper 3 — (progressively harder)

Marking: +4 correct, –1 wrong, 0 unattempted. Maximum marks **240**.

Answer Key

Q	Ans	Q	Ans	Q	Ans	Q	Ans	Q	Ans	Q	Ans
1	C	11	C	21	A	31	B	41	B	51	D
2	B	12	B	22	D	32	C	42	C	52	A
3	D	13	B	23	C	33	A	43	D	53	A
4	C	14	B	24	C	34	D	44	A	54	D
5	A	15	D	25	A	35	B	45	A	55	D

7	B	17	D	27	A	37	A	47	A	57	C
8	C	18	A	28	B	38	C	48	D	58	C
9	D	19	A	29	C	39	A	49	B	59	C
10	C	20	B	30	B	40	C	50	D	60	D

Answer-key distribution: A = 15, B = 15, C = 15, D = 15.

Worked Solutions

1. (C) परमो is produced by विसर्ग-सन्धि: when the final विसर्ग of परमः (which sits on an अ, i.e. -अः) is followed by a voiced consonant such as ध, the अः becomes ओ — so परमः + धर्मः → परमो धर्मः. The underlying word is therefore the nominative singular masculine परमः, agreeing with धर्मः. It is not the neuter परमम्, not the locative परमे, and not the dual परमौ — none of those would give परमो before a voiced sound, and none agree with the nominative singular धर्मः.

2. (B) हि is an emphatic निपात (indeclinable particle) meaning 'verily / indeed'. It adds force but is not part of the core predication, which is सेवा परमो धर्मः ('service is the highest duty'). So dropping हि leaves a complete, meaningful sentence with the same proposition, only less emphatic. हि is not an interrogative marker, is not required for grammaticality (the sentence stands without it), and never negates — Sanskrit negation is न, not हि.

3. (D) परमः is a superlative-sense word, 'highest/supreme in rank'. Calling सेवा the परमो धर्मः places it at the top of a scale that still contains other genuine duties — it does not erase

them. So the correct implication is that other duties exist but none ranks above service. It does not mean service is the sole duty (that would deny all other धर्म), nor the easiest (परमः is about rank, not effort), nor the earliest (that confuses परमः 'highest' with 'first in time').

4. (C) Mapping सेवा हि परमो धर्मः onto 'compassion is verily the highest virtue': सेवा (subject) ↔ compassion; हि (emphatic particle) ↔ verily; परमः (ranking adjective) ↔ highest; धर्मः (the category-noun the subject tops) ↔ virtue. So धर्मः corresponds to 'virtue'. It does not map to 'compassion' (that is सेवा's slot), nor to 'verily' (हि's slot), nor to 'highest' (परमः's slot).

5. (A) धर्मः here is 'duty / what one ought to do', and परमः is 'highest in rank'. 'Among all the things one ought to do, service stands at the very top' faithfully renders both: 'things one ought to do' = धर्मः, 'very top' = परमः, 'service' = सेवा. The distractors each plant a known error: परमः is rank not time; धर्मः is duty not धनम् (wealth); and the thesis names सेवा, not दान.

6. (A) The very rule that gives परमो धर्मः — final -अः becomes -ओ before a voiced consonant — applies to बालः before the voiced ग्. So बालः + गच्छति → बालो गच्छति. Leaving बालः unchanged ignores the sandhi; बाला would be a different (feminine/plural) stem; and बालर् invents a non-occurring र् ending (that र्-form arises only before certain vowels/consonants under a different sub-rule, not before ग्).

7. (B) -अः → -ओ happens only before a VOICED sound. व् is voiced, so रामः + वदति → रामो वदति is correct. The other three follow unvoiced consonants — क् (करोति), त् (तिष्ठति), प् (पठति) — before which विसर्ग does not become ओ (it stays as विसर्ग, e.g. रामः करोति). Producing रामो before those is the classic over-generalisation trap.

8. (C) विसर्ग-sandhi is conditioned by what follows. In pause / before an unvoiced stop the विसर्ग simply remains (परमः). The -अः → ओ change is triggered specifically by a following voiced sound (as धर्मः, a vowel अ giving परमोऽयम्, etc.). So the विसर्ग is context-sensitive, not unconditional. It does NOT become ओ everywhere, does not vanish everywhere, and does not become र् everywhere — each of those treats one conditioned outcome as universal.

9. (D) Only परमो धर्मः involved a sandhi (परमः + धर्मः). सेवा and हि were already in their base forms (सेवा ends in आ; हि is indeclinable). So the de-sandhi'd string is सेवा हि परमः धर्मः. सेवाः wrongly pluralises the subject; परमम्/धर्मम् wrongly switch to accusative (the thesis is a nominative equation, not an object); and परमो धर्मो leaves the sandhi un-undone and even alters धर्मः.

10. (C) परमः + धर्मः → परमो धर्मः is -अः + voiced CONSONANT → ओ + consonant. ध्व/द् are voiced consonants, so देवः + ददाति → देवो ददाति matches exactly. The distractors all put a VOWEL after the विसर्ग: before एव (e) and इति (i) the outcome is not a plain ओ + word; before अ the result is देवोऽपि with avagraha (ऽ), written joined, not 'देवो अपि' with a gap. Only the voiced-consonant case parallels धर्मः.

11. (C) वृद्धि-sandhi: a final आ (or अ) followed by ए becomes ऐ. So सेवा + एव → सेवैव. Leaving them apart (सेवाएव) ignores vowel sandhi; आ + ए does not collapse to plain ए (सेवेव); and

सेवायव invents a glide य् that this combination does not use. This tests applying a sandhi rule beyond the विसर्ग case to a fresh vowel junction.

12. (B) The chapter defines सेवा as service rendered through one's own time, body and presence, and दान as the giving of money or goods, even from afar. Mailing a grant without ever showing up is precisely the दान pattern — generous, but lacking the personal presence that marks सेवा. It is not सेवा merely because it helps (the means matters, not just the outcome), it is squarely inside दान (not outside both), and money is explicitly NOT equated with presence.

13. (B) सेवा is hands-on service with presence (Y: sitting, feeding, preparing कषायम्); दान is giving goods/money from afar (X: funding remotely). So Y = सेवा, X = दान, and the lesson's thesis (सेवा परमो धर्मः) prizes Y's सेवा most. The first option swaps the two roles. 'Both दान' erases Y's evident presence; 'both सेवा by intention' ignores that the chapter classifies by the MODE of help (presence vs goods), not intention alone.

14. (B) The chapter ranks सेवा highest because it engages the doer personally — time, body, presence — beyond merely giving money/goods (दान). That personal, sustained involvement is what makes it the परमो धर्मः. The distractors misstate the chapter: it does not condemn दान as wrong, does not call दान impossible, and does not argue from cheapness — सेवा's value is its personal presence, not its price.

15. (D) Per the chapter, handing over money is दान. To rise to सेवा it must be accompanied by the giver's personal time and presence in the act of helping. So the precise correction names the act as दान and points to what would make it सेवा. It is wrong to call money-giving 'never good' (दान is praised, just distinct), wrong to call it already perfect सेवा (it lacks presence), and wrong to equate the two terms (the chapter's whole point is the distinction).

16. (D) सेवा is service through presence and effort; दान is giving money/goods. The penniless student gives only time and presence (reading aloud) — pure सेवा with no goods transferred. The other three transfer money or goods (wired funds, a sponsored wing, shipped medicines) from a distance — the दान pattern, with little or no personal presence. So only the student's act is सेवा free of दान.

17. (D) अ-stem masculine accusative singular adds -म्: चिकित्सक + म् → चिकित्सकम्. The इन्-stem रोगिन् in the accusative singular is रोगिणम् (the न् becomes ण by णत्व after the र in the stem, and -अम् is added). So the pair is चिकित्सकम् / रोगिणम्. Leaving them unchanged gives nominatives; चिकित्सकेन/रोगिणा are instrumentals; and चिकित्सकाः/रोगिणः are plural forms, not accusative singulars.

18. (A) From the इन्-stem रोगिन्, the masculine accusative plural is रोगिणः (with णत्व changing न्→ण after र). That is the form for 'the sick' as a plural object of सेवते. रोगिणम् is accusative SINGULAR (one sick person); रोगिभिः is instrumental plural ('by the sick');

रोगिणाम् is genitive plural ('of the sick'). Only रोगिणः is the accusative plural the sentence needs.

19. (A) णत्व (retroflexion) turns न् into ण when a preceding र (or ष/ऋ) is in the same word, even across intervening sounds — रोग...न् → रोग...ण, giving रोगिणम्/रोगिणः. चिकित्सक's क is unrelated to this न्→ण rule, so it is unaffected. The distractors are false: इन्-stems do not retroflex every consonant; accusative endings carry no inherent ण; and both words are masculine — gender is not the cause.

20. (B) The -क agent suffix (as in चिकित्सकः) makes 'doer' nouns: अध्यापक → अध्यापकः, 'one who teaches'. The -इन् possessive/characterising suffix (as in रोगिन्) makes 'one having X': धन + इन् → धनिन्, 'one having wealth'. So the correct pairing keeps -क for the agent and -इन् for the possessor. Swapping them (अध्यापिन्/धनकः), or forcing both onto one suffix, breaks the very contrast the chapter draws between चिकित्सकः and रोगिन्.

21. (A) इन्-stem masculines show रोगी in the nominative singular because the stem-final न् is lost and the इ lengthens to ई. The hidden न् reappears in oblique forms — रोगिणम् (acc sg), रोगिणः (acc pl) — confirming रोगिन् as the true stem. So रोगी is simply the nominative-singular face of रोगिन्. It is not a नदी-type ई-stem, not an unrelated look-alike, and not a feminine form (रोगी here is masculine, 'the sick man').

22. (D) The doer ('physician') is the subject → nominative singular चिकित्सकः. The thing served ('the sick'), as the direct object of सेवते, takes the accusative plural रोगिणः. So चिकित्सकः ... रोगिणः is correct. Making चिकित्सकम् accusative leaves no subject; रोगिभ्यः is dative/ablative (not the accusative object); and चिकित्सकेन/रोगिणाम् (instrumental + genitive) do not express 'X serves Y' at all.

23. (C) 'Two physicians' → nominative DUAL of the अ-stem: चिकित्सकौ. 'One sick man' as object → accusative SINGULAR of रोगिन्: रोगिणम्. So चिकित्सकौ ... रोगिणम्, चिकित्सकाः/रोगिणः are plurals (many of each); चिकित्सकौ/रोगिणौ would be 'two doctors, two patients' (object dual, not singular); and चिकित्सकम्/रोगी invert the cases (object-marked doctor, subject-marked patient).

24. (C) सेव् conjugates in the आत्मनेपद (middle voice), so its present third-singular is सेवते, with the आत्मनेपद ending -ते. सेवति applies the परस्मैपद ending -ति, which this धातु does not take. सेवयति is a causative-looking form ('causes to serve'), not the simple present. सेविष्यति is future tense ('will serve'), not present. The chapter's चिकित्सकः रोगिणः सेवते uses precisely सेवते.

25. (A) Third-person PLURAL आत्मनेपद present takes -अन्ते: सेव् → सेवन्ते ('they serve'). सेवन्ति is the परस्मैपद plural ending (-अन्ति), which सेव् does not use. सेवते is third-person SINGULAR ('he/she serves'), not plural. सेवामहे is FIRST-person plural ('we serve'). Only सेवन्ते is third-person plural in the correct pada.

26. (B) चिकित्सकः is nominative (subject = the one serving); रोगिणः is accusative plural (object = those served). So the meaning is 'the physician serves the sick'. 'The sick serve the

physician' reverses subject and object. 'Serves WITH the sick' wrongly reads an instrumental sense into the accusative. 'The physician's sickness serves' treats रोगिणः as a genitive subject, which it is not — it is the accusative object of सेवते.

27. (A) First-person singular present आत्मनेपद takes -एः सेव् → सेवे ('I serve'). सेवामि uses the परस्मैपद -मि ending, which सेव् does not take. सेवसे is SECOND-person singular ('you serve'). सेवामहे is FIRST-person PLURAL ('we serve'). Only सेवे is first-person singular in the correct pada.

28. (B) सेव् governs the accusative for the one served, so 'serves the king' is नृपम् सेवते → नृपं सेवते (accusative singular नृपम्, written नृपं before स). नृपेण is instrumental ('by/with the king'), नृपाय is dative ('for the king'), and नृपस्य is genitive ('of the king') — none expresses the direct object that सेवते requires. This mirrors रोगिणः सेवते in the chapter.

29. (C) The तद्धित -वत् (in the 'इव / like' sense) attaches to a noun to mean 'like that noun': यन्त्र + वत् = यन्त्रवत् ('like a machine'); so सिंह + वत् = सिंहवत् ('like a lion'). सिंहिन् uses the possessive -इन् ('having a lion'), सिंहकः uses the -क suffix (a diminutive/agent-type, not 'like'), and सिंहाय is just the dative case ('for a lion') — none expresses 'like a lion'.

30. (B) Although -वत् can mean either 'like' or 'possessing', the chapter glosses यन्त्रवत् as यन्त्रम् इव, fixing the 'like' sense: the doctor works LIKE a machine — tireless and steady. Reading it as 'having/owning a machine' (the धनवत् 'possessing' sense) misses the simile and makes no sense in the passage. -वत् never means 'against' or 'without'. Picking the right one of the two senses by context is the trap here.

31. (B) यन्त्रवत् = यन्त्रम् इव, the 'like' sense. अग्निवत् 'like fire' uses that same comparative sense and matches. The other three are given explicitly in the 'possessing/having' sense (पुत्रवत् = having a son, बुद्धिवत् = having intelligence, गुणवत् = having virtues) — that is the OTHER -वत् meaning (धनवत्-type), not the simile sense of यन्त्रवत्.

32. (C) On the यन्त्रवत् (= 'like a machine', tireless) model, X-वत् praises by comparing the doer to X's salient quality. A river's salient trait is its continuous, ceaseless flow, so 'सरितवत्' aptly praises unceasing, flowing care. It does not mean she OWNS a river (that would be the possessive -वत्), it is a positive simile (not 'cold rigidity', which is the negative of machine-likeness), and 'overflow causing harm' twists the image into a defect the simile is not meant to convey.

33. (A) The simile यन्त्रम् इव praises the doctor for a machine's behavioural quality — it keeps working tirelessly and steadily without flagging. That is the point of comparison, applied to his untiring service. The distractors fix on irrelevant machine traits: its material (metal/gears), its cost/modernity, or its need for an operator — none of which is the quality the chapter holds up. A vague 'tool-like' loses exactly this 'untiring motion' image.

34. (D) Tireless, steady, hour-after-hour effort is exactly the यन्त्रवत् image (यन्त्रम् इव, 'like a machine'). रोगिवत् ('like a sick man') would imply weakness, the opposite of tireless. उपाधिवत्

('like a degree') and कषायवत् ('like a decoction') compare to a qualification and a medicine respectively — neither conveys untiring effort. Only यन्त्रवत् fits.

35. (B) उपाधि: is a degree/qualification — what one earns by study (an M.D., for instance). पदवी is a position/designation — the post or rank one holds. So उपाधि: = degree, पदवी = post. Swapping them reverses the chapter's contrast; they are not synonyms; and neither is a medicine (कषायम्) or a machine (यन्त्रम्). The doctor's giving up the chase for BOTH उपाधि: and पदवी is the point — outward credentials vs outward office.

36. (B) 'Head of Department' is a POST one holds → पदवी; an honorary doctorate is a QUALIFICATION/degree → उपाधि:. So the order is पदवी, उपाधि:. The first distractor swaps the labels; calling both पदवी or both उपाधि: collapses the very distinction the chapter uses to contrast office (पदवी) with credential (उपाधि:).

37. (A) Listing both उपाधि: (credential) and पदवी (rank) signals that the doctor renounced EVERY form of outward distinction — not just one — to devote himself to सेवा. Choosing 'only study' or 'only office' keeps half the worldly pursuit the chapter says he abandoned. He did NOT renounce his medical practice — practising is exactly the सेवा he chose; what he gave up was the chasing of titles and posts.

38. (C) The thesis सेवा हि परमो धर्मः, illustrated by the doctor who drops उपाधि: and पदवी to serve, ranks सेवा above both. Degrees and posts are at best means or outward trappings; service is the परमो धर्मः. The first two distractors invert the ranking by arguing the credential or the rank is prerequisite/superior; the third flattens the deliberate hierarchy the chapter builds.

39. (A) The chapter elevates सेवा and humane (मानवीयाः) qualities above outward distinctions, so it would criticise judging healers solely by उपाधि: and पदवी, urging that service and humane care matter more. It would not endorse the clinic's credential-only test, would not substitute wealth as the criterion, and would not value machines over doctors (यन्त्रवत् is a simile FOR the doctor's effort, not a replacement for him).

40. (C) The -ईय तद्धित (as in मानव → मानवीय, 'befitting a human') forms 'pertaining to / befitting X'. Applied to देव it yields दैवीय/दैव, 'pertaining to a god'. देववत् uses -वत् ('like a god'), a different suffix; देविन् uses possessive -इन् ('having a god'); देवकः uses agent/diminutive -क. Only the -ईय form parallels मानवीय's word-formation.

41. (B) मानवीय (मानव + -ईय) means 'befitting a human / humane', so मानवीयाः गुणाः are humane qualities — compassion, kindness, care — which the chapter ranks above outward titles. It does not mean a headcount of humans, nor qualities of machines (that would be the यन्त्र image, the opposite pole), nor mere physical strength; the contrast is moral/humane character versus outward distinction.

42. (C) Adjectives agree with their noun in gender, number, and case. सेवा is feminine singular nominative, so the -ईय adjective takes the feminine singular form मानवीया →

मानवीया सेवा. मानवीया: keeps the masculine/plural agreement (wrong for a feminine singular); मानवीयम् is neuter singular; मानवीयान् is masculine accusative plural. Only मानवीया matches सेवा.

43. (D) The chapter ranks humane qualities (मानवीया: गुणाः) above credentials (उपाधिः) and posts (पदवी). The parallel is judging a teacher by her kindness and patience — her humane conduct — not by certificates, title, or salary. The three distractors each judge by exactly the outward markers (credentials, title, pay) the chapter ranks BELOW humane qualities.

44. (A) The chapter blends two images: यन्त्रवत् praises a machine's tireless STAMINA, while मानवीया: गुणाः demand a human's WARMTH and compassion. The ideal servant unites both — untiring in effort, humane in heart. Being cold/mechanical in feeling too would betray the मानवीय side; being warm but quick to tire would lack the यन्त्रवत् stamina; being indifferent in both fails both ideals. Only the balanced reading honours both terms.

45. (A) Among the six classical tastes (मधुर sweet, अम्ल sour, लवण salty, कटु pungent, तिक्त bitter, कषाय astringent), कषाय is the ASTRINGENT taste. Sweet is मधुर, sour is अम्ल, and bitter is तिक्त — each a distinct member of the षड्रस. So कषाय as a taste means astringent, not any of those.

46. (D) A word with two senses is disambiguated by context. Here the surrounding scene — a doctor preparing it for the sick — fixes कषायम् as the herbal decoction (क्वाथ, medicine), not the astringent taste. Gender, number, and word-position do not select between the two senses; only the medical context does. This mirrors the chapter's own gloss कषायम् = क्वाथः.

47. (A) The word रस ('taste') and the cookery setting fix कषाय in its TASTE sense — astringent. There is no medical scene to invoke the decoction meaning. The other options all force the क्वाथ (decoction/medicine) sense, which the taste-talk context overrides — exactly the context-driven disambiguation the chapter highlights, just resolving the OTHER way than in the medical scene.

48. (D) The chapter uses the preparing of कषायम् as tangible evidence that सेवा is hands-on, concrete care — service in action, not just words. It is not a device to earn a degree (उपाधिः) or a higher post (पदवी) — the doctor renounced chasing those — and it is not a SUBSTITUTE for presence; it is part OF his bedside presence. So it proves the reality of his service.

49. (B) कषाय genuinely has both senses — herbal decoction (क्वाथ) and astringent taste — and context decides which is meant. It never means a machine (that is यन्त्र). It is not restricted to the taste sense (the chapter's medical scene uses the decoction sense). And it never means a degree (उपाधिः); the third option also gets the medical scene backwards. Only the first statement is fully accurate.

50. (D) चिकित्सक is built with the agent -क ('one who heals'); रोगिन् with the possessive/characterising -इन् ('one having रोग'); यन्त्रवत् with -वत् ('like a machine'); मानवीय

with -ईय ('befitting a human'). The correct sequence is -क, -इन्, -वत्, -ईय. The first distractor swaps the first two; the second reverses the whole order; and 'all -क' ignores three distinct suffixes the chapter actually uses.

51. (D) The false pair is पदवी = herbal decoction; पदवी actually means a post/position, while the herbal decoction is कषायम्. The other three are correct: उपाधि: is a degree, कषायम् is a herbal decoction, and मानवीया: means humane. The trap swaps पदवी's meaning with कषायम्'s.

52. (A) चिकित्सक: (agent, -क) = the healer; रोगिन् (characterising, -इन्) = the sick; and the chapter has the physician serving the sick (रोगिणः). The first distractor swaps both roles AND both suffixes; the second turns both into 'medicine' (that is कषायम्); the third keeps the roles but swaps the suffixes. Only the first statement gets roles and suffixes both right.

53. (A) The chapter ranks humane qualities and service above degrees and posts, and proves it with the doctor who renounces उपाधि:/पदवी to serve रोगिणः. The first distractor inverts the ranking and gives the wrong exemplar (a title-collector). 'धनम् is परमो धर्मः' contradicts the thesis (सेवा is). 'यन्त्र outranks the doctor' misreads यन्त्रवत्, a simile praising the doctor, as literal replacement.

54. (D) Two facts together: परमो = परमः after विसर्ग-sandhi before the voiced ध् (परमः + धर्मः → परमो धर्मः), and सेव् is आत्मनेपदी, so its present third-singular is सेवते. The distractors each pack errors: परमो is NOT unrelated to परमः and सेव् is not सेवति (परस्मैपद); there IS sandhi in परमो धर्मः; and परमो derives from परमः, not the accusative परमम्, while सेवयति is causative, not the simple present.

55. (D) Error 1: 'morning duty FIRST' misreads परमः ('highest in rank') as 'first in time'. Error 2: the paraphrase makes 'service' the PREDICATE ('...is the supreme service') when सेवा is the SUBJECT and धर्मः the predicate ('service is the highest duty'). That is two errors. It is not error-free; it is more than just the परमः slip; and हि ('verily') is not actually mistranslated in the paraphrase, so 'three' over-counts.

56. (B) The fullest proof joins every thread: giving up degrees (उपाधिः) and posts (पदवी), serving tirelessly (यन्त्रवत्) and humanely (मानवीया: गुणाः) the sick (रोगिणः) — each choice subordinates outward distinction to service. The distractors each break the chain: collecting titles and serving only the rich contradicts the thesis; mere distant दान lacks presence; and serving only when paid betrays the मानवीया: and selfless quality of सेवा.

57. (C) The correct sentence captures all three: 'ranks highest among duties' = परमः as supreme rank; 'in person rather than from afar' = सेवा vs दान; 'tirelessly yet with a warm, humane heart' = यन्त्रवत् + मानवीय balance. Each distractor breaks at least one pillar: the first misreads परमः as 'morning' and confuses सेवा with sending money; the second elevates दान and is cold (no मानवीय); the third demotes सेवा to 'one of many equal' duties and reintroduces title-chasing.

58. (C) उपाधि: (a degree) and पदवी (a post) are possessions/distinctions one HAS; सेवा — actively serving the sick, tirelessly and humanely — is what one DOES. So the split is HAS: उपाधि:/पदवी; DOES: सेवा. The first distractor puts सेवा (an action) on the HAS side; the second misclassifies humane qualities and the doing/having columns; and 'all are things one HAS' erases the central action of serving. (Note: कषायम् is the concrete medicine the doctor's DOING produces.)

59. (C) उपाधि: and पदवी are named so the chapter can rank them BELOW सेवा — the doctor's renouncing their pursuit is the very evidence for the thesis. So mentioning them serves the opposite purpose the debater claims. It is false that they are never mentioned (they are, repeatedly); false that the chapter values them over service (it inverts that); and false that all three are equal (the chapter builds a clear hierarchy with सेवा on top).

60. (D) Three faults: (1) roles — चिकित्सकः (nominative) is the doer who serves, so the object 'the sick' must be accusative रोगिणः, not nominative रोगी; the physician serves the sick, not vice-versa. (2) verb — सेव् is आत्मनेपदी, so the form is सेवते, not the परस्मैपद सेवति. (3) -वत् — यन्त्रवत् = यन्त्रम् इव, 'LIKE a machine' (tireless), not 'owning a machine'. Only the option fixing all three is right; the others leave one or more errors standing.
