

Olympiad Test Paper — Sanskrit (Class 7) — Paper 3

Chapter 4: न लभ्यते चेत् आम्लं द्राक्षाफलम् (The Fox and the Grapes)

Paper 3 — (progressively harder)

Subject	Sanskrit (NCERT Class 7, Deepakam)
Chapter	4 — न लभ्यते चेत् आम्लं द्राक्षाफलम् (The Fox and the Grapes)
Total Questions	60 (Multiple Choice, single correct)
Maximum Marks	240
Suggested Time	90 minutes

Marking scheme: +4 for each correct answer · -1 for each wrong answer · 0 if unattempted.

Instructions: Each question has four options (A), (B), (C), (D); exactly one is correct. Classic P3 traps: the moral indicts the dishonest EXCUSE, not the failed effort (hard work at the unreachable is a separate, even noble, matter); उत्पतति is PRESENT (उत् = उपसर्ग 'up', NOT the past augment अ-, which gives उदपतत्); the तसिल् suffix -तः makes direction ADVERBS (वामतः 'on the left'), not noun-case forms; पिपासा (← पा 'drink' = thirst) vs बुभुक्षा (← भुज् 'eat' = hunger) are desideratives named by the ACTION desired; द्राक्षालता is the whole VINE (द्राक्षा + लता), द्राक्षा the single grape, द्राक्षाफलम् the grape-fruit. Do not write on this paper — mark answers on your answer sheet.

1. In the chapter, the fox is glossed both as शृगालः and described as लोमशा. Taken together, these two facts establish that the protagonist is:

- (A) a bird with feathers (पक्षी) (B) a hairy four-legged animal — the fox/jackal
(C) a smooth, hairless reptile (D) a plant, since लोमशा describes the vine

2. The story is set वने. If a friend asked where the action happens in plain English, the most exact answer grounded in this word is:

- (A) 'in the forest' — वने is the locative of वनम्
(B) 'to the forest', since वने is a dative of motion (C) 'of the forest', since वने is a genitive
(D) 'forests', since वने is plural

3. Why is शृगालः, and not द्राक्षालता, called the protagonist of the fable?

- (A) the vine never appears in the story at all
(B) द्राक्षालता is actually another name for the fox

(C) the fox drives every action — wandering, jumping and finally speaking — while the vine is only the unmoving object it desires

(D) the vine speaks the moral, so it shares the lead role

4. At the opening the fox is श्रान्तः, glossed क्लान्तः. Choosing between two near-synonyms, the precise shared sense is:

(A) mentally sad about a loss

(B) angry at being insulted

(C) pleased after a good meal

(D) physically worn out from exertion — 'tired/fatigued'

5. The chapter stacks श्रान्तः, खिन्नः and पिपासायुक्तः on the fox. Which single English phrase captures all three at once?

(A) rested, cheerful and well-fed

(B) tired, dejected and thirsty

(C) proud, wealthy and strong

(D) angry, sleepy and hungry

6. The fox's thirst is named पिपासा and equated with तृषा, glossed पातुम् इच्छा. The gloss पातुम् इच्छा literally analyses thirst as:

(A) the wish (इच्छा) to drink (पातुम्)

(B) the wish to eat

(C) the act of having drunk already

(D) the inability to drink

7. खिन्नः is distinguished from श्रान्तः in the chapter. The cleanest contrast is that खिन्नः is a state of the ____ while श्रान्तः is a state of the ____.

(A) body (fatigue) ... mind (dejection)

(B) stomach (hunger) ... throat (thirst)

(C) left side ... right side

(D) mind (dejection) ... body (fatigue)

8. Suppose a story said a wanderer was पिपासायुक्तः but had just eaten a full meal. Which of his three opening conditions would this REMOVE from the fox-description without touching the other two?

(A) बुभुक्षा (hunger) would be gone, but श्रान्तः (tired) and पिपासा (thirst) could still hold

(B) पिपासा would be gone, since eating quenches thirst

(C) श्रान्तः would be gone, since eating restores energy fully

(D) all three would be removed at once by eating

9. Why does the chapter pair तृषा with पिपासा rather than with बुभुक्षा?

(A) तृषा and पिपासा both mean thirst (the wish to drink), so they are synonyms; बुभुक्षा is hunger

(B) तृषा means hunger, matching बुभुक्षा

(C) तृषा means tiredness, a synonym of श्रान्तः

(D) तृषा is a direction word like वामतः

10. The opening lines give the fox four labels: शृगालः, श्रान्तः, खिन्नः, पिपासायुक्तः. Which label alone identifies WHAT the creature is, while the other three describe HOW it feels?

(A) श्रान्तः, because it names the species 'the weary kind'

(B) शृगालः (it is a fox) — the rest report its tired, sad, thirsty condition

- (C) पिपासायुक्तः, because thirst defines the animal
(D) खिन्नः, because sadness is the fox's species name

11. A classmate says पिपासायुक्तः must mean 'one who drank'. The correct correction is:

- (A) yes, exactly — it describes a finished act of drinking
(B) no — it actually means 'one who is hungry'
(C) no — it is a direction word meaning 'towards water'
(D) no — the -युक्त part means 'joined with/full of', so it means 'filled with thirst', i.e. still wanting to drink

12. द्राक्षालता is a compound. Identify both members AND the resulting whole correctly:

- (A) द्राक्षा ('grape') + लता ('creeper') → the grape-vine, the whole climbing plant
(B) द्राक्ष ('sour') + आलता ('hanging') → a sour hanging fruit
(C) द्राक्षा ('grape') + अलता ('without creeper') → a grape with no vine
(D) द्राक्षाल ('fox') + ता ('forest') → a fox in the forest

13. Sanskrit writes one word द्राक्षालता where English needs the two-part 'grape-vine'. What general feature of Sanskrit does this best illustrate?

- (A) Sanskrit can never express plant names
(B) Sanskrit always uses more words than English
(C) Sanskrit forbids joining two nouns together
(D) Sanskrit readily fuses two nouns into a single compound word

14. Match the three closely related grape-words to their exact senses: द्राक्षा, द्राक्षाफलम्, द्राक्षालता.

- (A) द्राक्षा = the grape (fruit); द्राक्षाफलम् = the grape-fruit (the grapes hanging); द्राक्षालता = the grape-vine (the plant)
(B) द्राक्षा = the vine; द्राक्षाफलम् = a single seed; द्राक्षालता = a grape
(C) द्राक्षा = sourness; द्राक्षाफलम् = the fox; द्राक्षालता = the forest
(D) द्राक्षा = the fruit; द्राक्षाफलम् = the plant; द्राक्षालता = a single grape

15. Within the title न लभ्यते चेत् आम्लं द्राक्षाफलम्, the word द्राक्षाफलम् (not द्राक्षालता) is used because the fox is judging:

- (A) the climbing plant's leaves (B) the forest as a whole
(C) the fruit he wanted to eat — the grapes — not the plant they grow on
(D) his own tiredness

16. The verb उत्पतति is analysed as उत् + the root पत् (with present endings). Its meaning and tense are:

- (A) '(he) leapt up' — past tense (B) '(he) will leap up' — future tense
(C) 'let him leap up' — imperative (D) '(he) leaps up' — present tense

17. In उत्पतति, the element उत् is best described as:

- (A) an उपसर्ग (prefix) that adds the sense 'up' to the root
- (B) the past-tense augment that marks completed action
- (C) a विभक्ति (case ending) showing the doer
- (D) a desiderative marker meaning 'wishes to'

18. The past-tense counterpart of उत्पतति is उदपतत्. Comparing the two forms, what NEW element appears in the past form?

- (A) a fresh prefix उद्- replacing उत्
- (B) the augment अ- inserted after the prefix, before the root (उत् + अ + पतत्)
- (C) a future suffix -ष्य
- (D) an imperative ending -तु

19. A student writes उत्पतत् for 'he leapt up'. Why is उदपतत् the correct past form instead?

- (A) because the prefix उत् is dropped entirely in the past
- (B) because the root पत् changes to प्ठ् in the past
- (C) the past needs the augment अ-, and उत् + अ becomes उद्, giving उदपतत्
- (D) because past tense uses the ending -ति, as in उत्पतति

20. Order these forms of the same verb from past to future: उदपतत्, पततु, उत्पतति, उत्पतिष्यति.

- (A) past उत्पतति, present उदपतत्, future पततु
- (B) past उत्पतिष्यति, present पततु, future उदपतत्
- (C) past पततु, present उत्पतिष्यति, future उत्पतति
- (D) past उदपतत्, present उत्पतति, future उत्पतिष्यति (पततु being the imperative, outside the time-line)

21. Why is it a mistake to read the उत् of उत्पतति as proof that the verb is past tense?

- (A) it is no mistake — any prefix automatically makes a verb past
- (B) उत् is a meaning-prefix ('up'), not a tense marker; the past is shown by the augment अ- (उदपतत्), which is absent here
- (C) उत् does mark the past, but only on the root पत्
- (D) the verb is actually future, so it cannot be past

22. The chapter's verb उत्पतति shares its prefix-pattern with words like उद्गच्छति. What does this tell us about उपसर्गs generally?

- (A) a prefix can only ever attach to the single root पत्
- (B) the same prefix (उत्/उद् '-up') can attach to different roots and lend each the sense 'up/upward'
- (C) prefixes change a verb's tense but not its meaning
- (D) prefixes are nouns that take case endings

23. The chapter marks the fox's attempts as एकवारम्, द्विवारम्, पुनः पुनः. The progression these words trace is:

- (A) a single attempt described three ways
- (B) front, behind, left — three directions
- (C) morning, noon, night — times of day
- (D) once, then twice, then again and again — escalating repeated effort

- 24.** Given that the fox jumps पुनः पुनः yet the verdict is आम्लम्, the plot logic is:
- (A) repeated success makes him praise the grapes as sweet
 - (B) he stops after one jump and walks away calmly
 - (C) repeated failure to reach the grapes leads him to call them sour as an excuse
 - (D) the grapes fall to him, so he eats and leaves
- 25.** What does the detail that the fox tried पुनः पुनः add to the FORCE of the moral?
- (A) it shows the fox was lazy and never truly tried
 - (B) it shows real effort was made, so the fault lies only in the dishonest verdict afterwards, not in laziness
 - (C) it proves the grapes really were sour
 - (D) it means the fox should have given up at once
- 26.** The fox's final word आम्लम् is contrasted in the chapter with what the grapes most likely truly were. The intended contrast is:
- (A) he calls them sweet though they were sour
 - (B) he calls them ripe though they were unripe
 - (C) he calls them sour (आम्लम्) though they were presumably sweet/desirable (मधुरम्)
 - (D) he calls them poisonous though they were medicinal
- 27.** In न लभ्यते चेत् आम्लं द्राक्षाफलम्, the word चेत् functions as:
- (A) 'not' — a second negative reinforcing न
 - (B) 'sweet' — describing the fruit
 - (C) 'if' — it makes the clause conditional ('IF it is not obtained ...')
 - (D) 'fox' — the subject of the sentence
- 28.** न लभ्यते is passive ('is not obtained'). What does using the passive (rather than 'the fox does not get') subtly do in the punchline?
- (A) it makes the grapes the active doer who refuse the fox
 - (B) it frames the failure impersonally, helping the fox dodge naming himself as the one who failed
 - (C) it turns the verb into past tense
 - (D) it changes आम्लम् into a verb
- 29.** Translate the whole punchline न लभ्यते चेत् आम्लं द्राक्षाफलम् as faithfully as possible:
- (A) 'The grape-fruit is sweet because it is obtained.'
 - (B) 'If the grape-fruit is not obtained, (then it is) sour.'
 - (C) 'The fox obtains the sour grape-fruit on the left.'
 - (D) 'If the fox is tired, the vine is sour.'
- 30.** The punchline is stated as a general maxim, not 'these grapes are sour'. The effect of this generality is that it:
- (A) turns the fox's single excuse into a universal pattern of behaviour the reader can recognise everywhere
 - (B) limits the lesson to grapes only
 - (C) tells the reader the fox finally ate the grapes

(D) proves all unreachable fruit is genuinely sour

31. The chapter is careful to say the fox's fault is the EXCUSE, not the failed jump. The deepest reason for this distinction is that:

- (A) jumping is always wrong, so the leap is the real sin
- (B) thirst caused the failure, so the body is to blame
- (C) failing despite effort is no moral fault, but lying about it to protect one's pride is
- (D) the grapes' height is the fox's moral error

32. Which real-life situation is the CLOSEST parallel to the fox's behaviour?

- (A) a boy who is not picked for the team and then loudly insists the sport is 'boring and pointless'
- (B) a boy who practises daily and is then chosen for the team
- (C) a boy who is not picked but trains harder to try again next year
- (D) a boy who congratulates the friend who was picked instead of him

33. Identify which of the following is NOT a fair statement of the fable's moral:

- (A) 'Do not belittle what you fail to obtain.'
- (B) 'Never attempt anything that looks difficult.'
- (C) 'Be honest about your failures instead of making excuses.'
- (D) 'Pride can tempt us to lie about what we cannot reach.'

34. The chapter notes that toiling at something genuinely unreachable can even be NOBLE, not foolish. How does this note sharpen the moral?

- (A) it tells readers to abandon hard goals immediately
- (B) it says effort and excuse are the same thing
- (C) it makes clear the fable condemns the excuse alone, never the act of striving — even striving in vain
- (D) it praises the fox for giving up

35. A friend summarises: 'The fox teaches us to give up early and then insult what we wanted.' How many errors does this summary contain, and what are they?

- (A) no errors — the summary is exactly right
- (B) one error — giving up early is fine, but insulting is wrong
- (C) one error — insulting is fine, but giving up early is wrong
- (D) two errors — the moral is NOT to give up early, and NOT to insult what we wanted; both are the wrong lesson

36. What does the fox's choice to SPEAK (declaring the grapes sour) reveal that simply walking away would not?

- (A) that he was physically able to reach the grapes
- (B) that the grapes were truly sour after all
- (C) that he was never actually thirsty

(D) his need to justify the failure aloud — exposing the dishonest rationalisation at the heart of the moral

37. The four direction words वामतः, दक्षिणतः, अग्रतः, पृष्ठतः all end in -तः (the तसिल् suffix). What grammatical category do they therefore belong to?

- (A) nouns in the accusative case
(B) indeclinable direction adverbs ('on/at the ... side')
(C) verbs in the present tense (D) adjectives agreeing with द्राक्षाफलम्

38. Why is वामतः grammatically different from a case form like वामम् even though both involve वाम?

- (A) वामतः is an unchanging adverb 'on the left' built with -तः, while वामम् is a noun/adjective inflected for case
(B) वामतः is the plural of वामम् (C) वामतः is the past tense of a verb वाम्
(D) they are identical in every way

39. Using the same तसिल् pattern, how would you most naturally say 'on the upper side' if उपरि-region is meant — i.e. what does the pattern predict?

- (A) a dative form ending in -आय
(B) a -तः adverb (e.g. उपरितः 'from/at the upper side') — the suffix attaches to a base to give a direction adverb
(C) a present verb ending in -ति (D) a genitive ending in -स्य

40. A sentence reads शृगालः वामतः अपश्यत्. The role of वामतः here is to tell us:

- (A) WHERE the fox looked — 'to/on the left' (an adverb modifying the looking)
(B) WHAT the fox looked at (the object 'a left thing')
(C) WHO looked (the subject of the verb) (D) WHEN the fox looked (the time)

41. Pair each तसिल् adverb with its opposite: वामतः, अग्रतः.

- (A) वामतः ('on the left') is opposed by दक्षिणतः ('on the right'); अग्रतः ('in front') is opposed by पृष्ठतः ('behind')
(B) वामतः is opposed by अग्रतः; पृष्ठतः is opposed by दक्षिणतः
(C) वामतः is opposed by पृष्ठतः; अग्रतः is opposed by दक्षिणतः
(D) वामतः is opposed by वनम्; अग्रतः is opposed by द्राक्षा

42. Standing where the fox stood and facing the vine, if अग्रतः is the vine ahead, then पृष्ठतः would point:

- (A) at the vine, the same as अग्रतः (B) to the fox's right
(C) behind the fox, away from the vine (D) to the fox's left

43. A guide says 'turn दक्षिणतः, then look अग्रतः.' In plain English the instruction is:

- (A) 'turn to the left, then look behind' (B) 'turn behind, then look to the left'
(C) 'turn to the right, then look ahead/in front' (D) 'turn ahead, then look to the right'

44. Which statement about the relationship between दक्षिणतः and the direction it names is TRUE?

- (A) दक्षिणतः means 'on the left', the opposite of दक्षिण
- (B) दक्षिणतः is a verb meaning 'to turn'
- (C) दक्षिण can mean 'right/south', and दक्षिणतः specifically gives the adverb 'on the right side'
- (D) दक्षिणतः is a synonym of पृष्ठतः 'behind'

45. पिपासा (thirst) and बुभुक्षा (hunger) are built on different roots. State both roots correctly and what each desires:

- (A) पिपासा ← भुज् ('eat'); बुभुक्षा ← पा ('drink')
- (B) पिपासा ← पा ('drink') = wish to drink; बुभुक्षा ← भुज् ('eat') = wish to eat
- (C) both ← पा ('drink'), differing only in degree (D) पिपासा ← पठ् ('read'); बुभुक्षा ← गम् ('go')

46. Both पिपासा and बुभुक्षा are formed by a special pattern that means 'wishes to do X'. This pattern is the:

- (A) past tense, formed with the augment अ-
- (B) imperative, used to give commands
- (C) locative case, showing place
- (D) desiderative (सन्), where the root is doubled/modified to express the WISH to perform the action

47. Notice the reduplication: पा → पि-पासा, भुज् → बु-भुक्षा. What does this repeated initial syllable signal in such words?

- (A) it marks the plural, meaning 'many drinks/foods'
- (B) it is the past-tense augment doubled
- (C) it is a direction prefix like उत्
- (D) it is the desiderative's reduplication, marking the WISH to perform the root's action

48. If a new word were coined from श्रु ('to hear') on the SAME pattern as पिपासा and बुभुक्षा, it would mean:

- (A) 'a wish/desire to hear' (a desiderative built on श्रु)
- (B) 'has heard already' (a past tense)
- (C) 'on the hearing side' (a -तः adverb)
- (D) 'two acts of hearing' (a plural)

49. Why does knowing only the ROOT let you decide whether a desiderative means hunger or thirst?

- (A) the root tells the direction of the desire
- (B) the root tells how many times one is hungry
- (C) the root names the action wished for — पा 'drink' gives thirst, भुज् 'eat' gives hunger
- (D) the root tells the colour of the food

50. The fox is described with पिपासा but the chapter does NOT use बुभुक्षा for him at the relevant moment. Which inference is most justified?

- (A) the fox can never feel hunger, only thirst
- (B) the scene foregrounds his thirst (wish to drink), whatever his hunger may be — the words track different desires
- (C) पिपासा and बुभुक्षा mean the same thing, so it makes no difference
- (D) बुभुक्षा means he is not a fox

51. Apply श्रान्तः/क्लान्तः to a new case: a runner who has just finished a long race and can barely stand is best called:

- (A) श्रान्तः (tired/exhausted)
- (B) आम्लम् (sour)
- (C) पिपासायुक्तः only — and never श्रान्तः
- (D) दक्षिणतः (on the right)

52. Two travellers: one has carried loads uphill all day; the other has had nothing to drink in the heat. Match the best single word to each.

- (A) the load-carrier is पिपासायुक्तः; the one without drink is श्रान्तः
- (B) both are best called आम्लम् (sour)
- (C) both are best called बुभुक्षायुक्तः (hungry)
- (D) the load-carrier is श्रान्तः (tired); the one without drink is पिपासायुक्तः (thirsty)

53. Which row pairs a chapter word with its meaning CORRECTLY?

- (A) आम्लम् = 'sweet'
- (B) खिन्नः = 'wealthy'
- (C) लता = 'fox'
- (D) उत्पतति = '(he) leaps up' (present)

54. Which row is the ONLY one where BOTH the word and its grammatical label are correct?

- (A) वामतः — a direction adverb formed with the तसिल् suffix -तः
- (B) उदपतत् — a present-tense form
- (C) पिपासा — a past-tense form
- (D) अग्रतः — a noun in the dative case

55. Spot the single statement that is FALSE:

- (A) शृगालः is the fox
- (B) आम्लम् means sour
- (C) पृष्ठतः means behind
- (D) द्राक्षालता means a single grape ready to eat

56. The fable's theme can be stated abstractly as a warning against a certain mental habit. That habit is:

- (A) over-preparing for easy tasks
- (B) sour-grapes thinking — devaluing a goal precisely because we failed to reach it
- (C) sharing credit too generously with others
- (D) saving resources for the future

57. The chapter teaches a moral AND a grammar focus together. The grammar focus is best summarised as:

- (A) the rules of the dative case and number agreement
- (B) the conjugation of irregular future verbs only
- (C) the तसिल् (-तः) direction adverbs plus the desiderative/state vocabulary of thirst, hunger and fatigue
- (D) the names and synonyms of the Sun

- 58.** A wiser fox, following the chapter's own lesson, would most appropriately say:
- (A) 'These grapes are sour and worthless anyway.'
 - (B) 'The forest itself is to blame for my failure.'
 - (C) 'I could not reach them today; perhaps I will manage another time.' — an honest admission
 - (D) 'I never wanted those grapes to begin with.'

- 59.** Combine moral and grammar: which compound statement is ENTIRELY correct?
- (A) The lesson is to give up early, and उत्पतति is past while पिपासा comes from भुज्.
 - (B) The lesson is not to belittle failure, but उत्पतति is past and पिपासा comes from भुज्.
 - (C) The lesson is not to belittle what we fail to get, and उत्पतति is present while पिपासा (thirst) comes from पा.
 - (D) The lesson is to belittle what we fail to get, and उत्पतति is present while पिपासा comes from पा.

- 60.** A final synthesis: the title न लभ्यते चेत् आम्लं द्राक्षाफलम् simultaneously names the OBJECT, the CONDITION and the VERDICT of the fable. Identify all three correctly.
- (A) object = the fox; condition = if tired; verdict = 'on the left'
 - (B) object = the vine; condition = if jumped; verdict = 'sweet'
 - (C) object = the forest; condition = if thirsty; verdict = 'behind'
 - (D) object = the grape-fruit (द्राक्षाफलम्); condition = if not obtained (न लभ्यते चेत्); verdict = 'sour' (आम्लम्)

Solutions — Sanskrit (Class 7), Chapter 4: न लभ्यते चेत् आम्लं द्राक्षाफलम् (The Fox and the Grapes) — Paper 3

Paper 3 — (progressively harder)

Marking: +4 correct, –1 wrong, 0 unattempted. Maximum marks **240**.

Answer Key

Q	Ans	Q	Ans	Q	Ans	Q	Ans	Q	Ans	Q	Ans
1	B	11	D	21	B	31	C	41	A	51	A

10	B	20	D	30	A	40	A	50	B	60	D

Answer-key distribution: A = 15, B = 15, C = 15, D = 15.

Worked Solutions

- (B)** शृगालः names the fox/jackal, and the descriptive word लोमशा ('hairy/furry') tells us about its coat — so the protagonist is a hairy four-legged animal. लोमशा describes the FOX, not the vine; the fox is no bird and is not hairless, so those readings fail.
- (A)** वने is the locative singular of वनम् and means 'in the forest', marking the place where the fox wanders. It is not a dative ('to'), not a genitive ('of'), and not a plural; the locative answers 'where?', which is exactly what the question needs.
- (C)** A protagonist is the character whose choices and actions carry the plot; here the fox wanders, leaps again and again, and utters the face-saving verdict, so it is central. The vine does appear but only as a passive goal; द्राक्षालता is the grape-vine, never the fox; and it is the fox, not the vine, who voices the excuse.

4. (D) Both श्रान्तः and its gloss क्लान्तः denote bodily weariness from effort. Sadness is carried separately by खिन्नः, so 'mentally sad' confuses two different words; the fox is neither angry nor pleased at this point. The two synonyms reinforce the single sense 'tired'.

5. (B) श्रान्तः = tired, खिन्नः = dejected/sad, and पिपासायुक्तः = full of thirst, so the trio is 'tired, dejected and thirsty'. The 'rested/cheerful' set reverses every term; 'proud/wealthy' is off-topic; and 'hungry' wrongly swaps thirst (पिपासा) for hunger (बुभुक्षा).

6. (A) पातुम् is the infinitive 'to drink' (from पा) and इच्छा is 'wish/desire', so पातुम् इच्छा = 'the wish to drink' — i.e. thirst. It is not 'to eat' (that would build on भुज्), not a completed past act, and not an inability; the gloss is a desire-to-drink phrase.

7. (D) खिन्नः = dejected/sad, an inner mental state; श्रान्तः = physically tired, a bodily state. The reversed pairing swaps them; hunger/thirst belong to बुभुक्षा/पिपासा, not these two; and left/right are direction words. So the order is mind then body.

8. (A) Eating addresses hunger (बुभुक्षा, from भुज् 'eat') only; it does not by itself slake thirst (पिपासा, from पा 'drink') nor erase the fatigue श्रान्तः. So a full meal removes hunger while tiredness and thirst can persist. The distractors wrongly let eating cancel thirst, fatigue, or everything.

9. (A) तृषा and पिपासा are two words for the same idea, thirst — the desire to drink — hence they are glossed together. बुभुक्षा is hunger (eating), so pairing तृषा with it would be wrong; तृषा is neither tiredness nor a direction. Synonyms of thirst belong together.

10. (B) शृगालः is the noun naming the kind of animal (fox); श्रान्तः, खिन्नः and पिपासायुक्तः are adjectives describing its momentary state (tired, sad, thirsty). None of those three names a species — they are feelings — so only शृगालः answers 'what is it?'.

11. (D) युक्त means 'joined with / possessed of', so पिपासायुक्तः = 'possessed of thirst' — the fox still craves drink, the opposite of having drunk. It is not a completed action, not hunger (that is बुभुक्षा), and not a direction word. The form marks an ongoing state, not a past deed.

12. (A) The compound splits द्राक्षा 'grape' + लता 'creeper', naming the whole grape-vine. There is no morpheme द्राक्ष meaning 'sour' (sour is आम्ल), no privative अ-लता here, and द्राक्षाल does not mean 'fox' (that is शृगालः). Only the grape + creeper split is real.

13. (D) द्राक्षालता fuses द्राक्षा and लता into one word, showing Sanskrit's love of compounding (समास). It clearly CAN name plants and clearly DOES join nouns, so 'never' and 'forbids' are false; and using one word for two is fewer, not always more, words.

14. (A) द्राक्षा is the grape itself, द्राक्षाफलम् the grape-fruit the fox wants, and द्राक्षालता the whole vine. The first wrong set swaps grape and vine; the second injects 'sour/fox/forest'; the third puts the plant-sense on फलम् and shrinks the vine to one grape. Only the correct triple keeps fruit-fruit-plant in order.

15. (C) द्राक्षाफलम् names the grape-fruit, the very thing he tried to reach; calling THAT 'sour' is his excuse. He is not commenting on the vine (द्राक्षालता), the forest, or his own state — the verdict targets the desired fruit, so फलम् is the right word in the punchline.

16. (D) उत् ('up') prefixes the root पत् ('fall/fly'), and the ending -ति is present third-person singular, giving 'he leaps up' now. The past would be उदपतत् (with the augment), the future उत्पतिष्यति, and the command पततु; none of those is the form here, which is plainly present.

17. (A) उत् is a verbal prefix (उपसर्ग) meaning 'up', steering पत् toward 'leap up'. It is NOT the past augment (that is the अ- seen in उदपतत्), not a case ending (those attach to nouns), and not a desiderative marker (that pattern gives पिपासा/बुभुक्षा). Prefix is the only correct label.

18. (B) उदपतत् = उत् + अ (augment) + पतत्; the अ- augment is the mark of the past (लङ्), and उत्+अ sandhies to उद. No new prefix is added (उद is just उत् before a vowel), there is no -ष्य (that is future), and no -तु (that is imperative). The augment is the added piece.

19. (C) Past (लङ्) requires the augment अ- before the stem; with the prefix, उत् + अ + पतत् → उदपतत्. The prefix is not dropped (it surfaces as उद), the root पत् is not replaced by पठ् 'read', and -ति is a PRESENT ending, not past. The missing augment is exactly what उत्पतत् lacks.

20. (D) उदपतत् (augment) = past, उत्पतति (-ति) = present, उत्पतिष्यति (-ष्यति) = future; पततु (-तु) is a command and sits outside the past-present-future axis. The other orderings misassign the tenses, e.g. treating the present उत्पतति as past or the imperative पततु as a tense.

21. (B) Tense is signalled by the augment and the endings, not by a prefix. उत् merely adds 'up'; the absence of the augment अ- and the present ending -ति make उत्पतति present. A prefix never forces past tense, उत् never marks tense on any root, and the form is present, not future.

22. (B) उत्/उद् 'up' joins पत् to give 'leap up' and गम् to give उद्गच्छति 'goes up', showing one prefix reused across roots with a consistent 'up' sense. Prefixes are not tied to one root, they shade MEANING (not tense), and they are not nouns taking case endings.

23. (D) एकवारम् = once, द्विवारम् = twice, पुनः पुनः = again and again; together they show the fox trying more and more times. They are not one attempt re-labelled, not directions (those use -तः), and not times of day. The sequence depicts mounting, repeated effort.

24. (C) He leaps again and again (पुनः पुनः) but cannot reach the grapes, so he saves face by declaring them sour (आम्लम्). He neither succeeds, nor quits after a single jump, nor obtains the grapes — the failure is precisely what triggers the sour-excuse.

25. (B) Because he tried repeatedly, we cannot accuse him of not trying; his error is purely the after-the-fact lie that the grapes were sour. The repetition refutes 'lazy', does nothing to make the grapes actually sour, and the moral does not commend giving up early.

- 26. (C)** The humour and lesson rest on the fox branding desirable, sweet-seeming grapes as 'sour' (आम्लम्) only because he failed; मधुरम् 'sweet' is the implied truth. He does not call them sweet, ripe, or poisonous — the verdict is specifically the false 'sour'.
- 27. (C)** चेत् is the conditional particle 'if', so न लभ्यते चेत् = 'if it is not obtained'. It is not another negative (न already supplies 'not'), not an adjective 'sweet', and not the noun 'fox'. The particle sets up the 'if ... then' structure of the punchline.
- 28. (B)** The passive न लभ्यते keeps the subject vague ('it is not obtained'), letting the fox avoid saying 'I could not get them' — fitting his face-saving mood. The grapes are not made active agents, the verb stays present, and आम्लम् remains an adjective, not a verb.
- 29. (B)** Word for word: न लभ्यते 'is not obtained', चेत् 'if', आम्लम् 'sour', द्राक्षाफलम् 'the grape-fruit' → 'if the grape-fruit is not obtained, (it is) sour'. The sweet/obtained version inverts the condition; the others smuggle in 'fox', 'on the left', or 'tired' that the line does not contain.
- 30. (A)** By phrasing it as a rule ('if it is not obtained, it is sour'), the chapter generalises the fox's lie into a recognisable human habit. It does not restrict the lesson to grapes, does not have him eat them, and certainly does not assert that unreachable fruit is truly sour.
- 31. (C)** Trying and failing is blameless; the ethical lapse is the dishonest re-labelling of the grapes as 'sour'. Jumping is not itself wrong, thirst is a state not a fault, and the height of the grapes is a circumstance, not a moral failing — only the false excuse is.
- 32. (A)** The fox devalues what he could not obtain to soothe his pride — exactly like dismissing the sport as 'boring' after being left out. Practising and getting chosen, training again, or congratulating a rival are honest, healthy responses that do NOT belittle the prize, so they are not parallels.
- 33. (B)** The moral targets the dishonest excuse, not effort — so 'never attempt difficult things' contradicts it and is the odd one out. The other three each capture the true lesson: don't belittle the unreachable, be honest about failure, and beware pride-driven excuses.
- 34. (C)** By granting that vain striving can be noble, the chapter isolates the lie as the sole target of blame; effort is never condemned. It does not counsel quitting, does not equate effort with the excuse, and does not praise the fox — who in fact gave up AND lied.
- 35. (D)** The fable neither recommends giving up early nor endorses belittling the goal — it warns AGAINST the belittling excuse. So both halves of the friend's summary are wrong, giving two errors. Treating either half as correct understates the mistakes.
- 36. (D)** By voicing 'they're sour', the fox externalises an excuse he could have kept silent — that spoken rationalisation is what the fable spotlights. Speaking does not prove he could

reach them, does not make the grapes sour, and says nothing about his thirst, which the opening already established.

37. (B) The तसिल् suffix -तः forms fixed adverbs of direction, so all four are indeclinable adverbs meaning 'on the ... side'. They are not nouns taking case endings, not verbs, and not adjectives that agree with a noun in gender/number; -तः marks adverbs.

38. (A) -तः derives an indeclinable adverb (वामतः 'on the left'), whereas वामम् is an inflected case form that changes with role and number. वामतः is not a plural, not a verb's past tense, and not identical to वामम् — the suffix changes its whole category to adverb.

39. (B) The lesson's pattern is base + -तः → direction adverb (वामतः, अग्रतः ...); applied to an 'upper' base it predicts a -तः adverb, not a noun case. -आय is dative, -ति is a verb ending, and -स्य is genitive — none of which express direction the way तसिल् -तः does.

40. (A) वामतः is a direction adverb, so it modifies the action अपश्यत् ('looked'), telling us the fox looked to the left. It is not the object (that would be an accusative noun), not the subject (शृगालः is), and not a time word; -तः answers 'in which direction?'.

41. (A) Left (वामतः) ↔ right (दक्षिणतः) and front (अग्रतः) ↔ behind (पृष्ठतः) are the natural opposite pairs. The other groupings cross front with left or back with right, which are perpendicular, not opposite; वनम् and द्राक्षा are not directions at all.

42. (C) अग्रतः 'in front' and पृष्ठतः 'behind' are opposites, so if the vine is ahead (अग्रतः), then पृष्ठतः points the opposite way — behind, away from the vine. It is not the same as अग्रतः, and behind is neither the right (दक्षिणतः) nor the left (वामतः).

43. (C) दक्षिणतः = to the right and अग्रतः = in front/ahead, so the instruction is 'turn right, then look ahead'. The wrong versions swap right for left and front for behind, mis-rendering the two -तः adverbs whose meanings are fixed by the chapter.

44. (C) दक्षिण underlies दक्षिणतः 'on the right side', consistent with its sense. It is not 'left' (that is वामतः), not a verb, and not a synonym of 'behind' (पृष्ठतः). The -तः form simply turns the base into a 'right-side' adverb.

45. (B) पिपासा derives from पा 'drink' (so thirst = wish to drink) and बुभुक्षा from भुज् 'eat' (so hunger = wish to eat). The first distractor swaps the roots; the second wrongly gives both the same root; the third invents roots पठ्/गम् that have nothing to do with thirst or hunger.

46. (D) Desiderative forms (सन्) express 'wishing to do' the root's action — पा → पिपासा 'wish to drink', भुज् → बुभुक्षा 'wish to eat'. This is not the past (augment अ-), not a command (imperative), and not a case (locative shows place, not desire).

47. (D) Desiderative stems reduplicate the root's first syllable (पि-, बु-) to express longing to do the action — hence thirst and hunger. It is not a plural marker, not the past augment

(which is अ-, not a reduplicated syllable), and not a direction prefix like उत्.

48. (A) पिपासा and बुभुक्षा are desideratives ('wish to drink / eat'), so the same pattern on श्रु 'hear' yields 'wish to hear'. It would not be a completed past act, not a direction adverb (that needs -तः), and not a plural; the desiderative encodes DESIRE for the root's action.

49. (C) Since a desiderative = 'wish to do [root's action]', the root fixes WHICH desire it is: drinking (पा) → thirst, eating (भुज्) → hunger. The root encodes the action, not a direction, a count, or a colour, so those distractors miss how the word is built.

50. (B) Because पिपासा (thirst, ← पा) and बुभुक्षा (hunger, ← भुज्) name DIFFERENT desires, using पिपासा foregrounds thirst at that point. It does not claim the fox can never be hungry, the two words are not synonyms, and बुभुक्षा is a hunger-word, not a non-fox marker.

51. (A) श्रान्तः (= क्लान्तः) means physically exhausted, exactly the runner's state. आम्लम् 'sour' describes taste, दक्षिणतः is a direction, and while the runner might also be thirsty, the word for the can't-stand fatigue itself is श्रान्तः.

52. (D) Heavy exertion → fatigue श्रान्तः; going without drink → thirst पिपासायुक्तः. The reversed pairing swaps cause and word; आम्लम् is a taste, not a bodily state; and बुभुक्षा is hunger, which neither exertion nor lack of DRINK specifically names.

53. (D) उत्पतति is the present 'leaps up', which is correct. आम्लम् means 'sour', not 'sweet' (मधुरम्); खिन्नः means 'sad/dejected', not 'wealthy'; and लता means 'creeper', not 'fox' (शृगालः). Only the verb pairing holds.

54. (A) वामतः is indeed a -तः direction adverb — both word and label fit. उदपतत् is PAST, not present; पिपासा is a desiderative noun (thirst), not a past tense; and अग्रतः is an adverb, not a dative noun. Only the वामतः row is fully correct.

55. (D) द्राक्षालता is the whole grape-VINE, not a single grape (that is द्राक्षा), so this statement is false. The other three are all true: शृगालः = fox, आम्लम् = sour, पृष्ठतः = behind. The vine-vs-grape confusion is the planted error.

56. (B) The fable warns against 'sour-grapes' thinking: belittling what we couldn't get to protect our pride. That is unrelated to over-preparing, to generosity with credit, or to thrift — those are not the dishonest self-excuse the fox models.

57. (C) The grammar the chapter spotlights is the -तः direction words (वामतः etc.) and the words for thirst/hunger/tiredness (पिपासा, बुभुक्षा, श्रान्तः). It is not a study of the dative, not a future-tense drill, and not Sun-names, which belong to other chapters.

58. (C) The lesson rewards honesty about failure, so the wise fox simply admits he could not reach them. The other replies all belittle or deflect — calling the grapes worthless,

blaming the forest, or denying he ever wanted them — which is exactly the sour-grapes excuse condemned.

59. (C) Three claims must all hold: the moral is 'don't belittle what you fail to get' (true), उत्पत्ति is present (true), and पिपासा derives from पा 'drink' (true) — only the first option keeps all three right. The others corrupt the moral, mis-tense उत्पत्ति, or mis-root पिपासा as भुज्.

60. (D) द्राक्षाफलम् is the object (the grapes), न लभ्यते चेत् the condition ('if not obtained'), and आम्लम् the verdict ('sour'). The distractors substitute the fox/vine/forest for the fruit, swap the condition for unrelated states, and replace the sour verdict with a direction or 'sweet' — none matches the line.
